Mitigated Negative Declaration

WARD: 4

1. Case Number: P14-0244 (Tentative Tract Map), P15-0085-0088 (Variances), P15-0089-0092

(Modifications)

2. **Project Title:** Tentative Tract Map 36703

3. **Hearing Date:** July 23, 2015

4. Lead Agency: City of Riverside

Community Development Department

Planning Division

3900 Main Street, 3rd Floor Riverside, CA 92522

5. Contact Person: Brian Norton, Associate Planner

Phone Number: (951) 826-2308, bnorton@riversideca.gov

6. **Project Location:** Situated on the northeasterly corner of the intersection of Central and Fairview

Avenues

7. Project Applicant/Project Sponsor's Name and Address:

Applicant

Steven Walker Communities

Steve Berzansky

7111 Indiana Avenue #300

Riverside, CA 92504

<u>Owner</u>

City of Riverside 3900 Main Street Riverside, CA 92522

8. **General Plan Designation:** LDR – Low Density Residential

9. **Zoning:** R-1-13000 – Single Family Residential

10. Description of Project:

The applicant is requesting a Tentative Tract Map (TM-36370) to facilitate the subdivision of a vacant parcel totaling approximately 2.12 acres into 6 lots. The parcel is zoned R-1-13000 – Single Family Residential and has a land use designation of LDR – Low Density Residential.

The proposed tract map will subdivide the subject site into six lots ranging in size from 13,033 square feet to 20,521 square feet, for future development of six single family residences. All lots will take access via a new 33-foot wide cul-de-sac street. None of the lots will gain access via Fairview Avenue. While the proposed tract map generally meets all of the development standards of the Zoning and Grading Codes, variances for lot width and lot depth are being requested by the applicant for Lots 1 and 2 due to the topography and limited safe access to the site.

11. Surrounding land uses and setting: Briefly describe the project's surroundings:

	Existing Land Use	General Plan Designation	Zoning Designation
Project Site	Vacant Land	LDR – Low Density Residential	R-1-13000 – Single Family Residential
North	Single Family Residential	LDR – Low Density Residential	R-1-13000 – Single Family Residential
East	Church	LDR – Low Density Residential	R-1-13000 – Single Family Residential
South	Church	LDR – Low Density Residential	R-1-13000 – Single Family Residential
West	Single Family Residential	LDR – Low Density Residential	R-1-13000 – Single Family Residential

12. Other public agencies whose approval is required (e.g., permits, financial approval, or participation agreement.):

None

ENVIRONMENTAL FACTORS POTENTIALLY AFFECTED:

The environmental factors checked below would be potentially affected by this project, involving at least one impact that is a "Potentially Significant Impact" as indicated by the checklist on the following pages.				
□Aesthetics	☐☐ Agriculture & Forest Resources	☐☐Air Quality		
☐ Biological Resources	☐ Cultural Resources	☐ Geology/Soils		
☐ Greenhouse Gas Emissions	☐☐ Hazards & Hazardous Materials	☐ Hydrology/Water Quality		
☐ Land Use/Planning	☐ Mineral Resources	□Noise		
☐ Population/Housing	☐ Public Service	Recreation		
☐ Transportation/Traffic	☐Utilities/Service Systems	☐☐Mandatory Findings of Significance		
DETERMINATION: (To be completed)	ted by the Lead Agency)			
On the basis of this initial evaluation recommended that:	n which reflects the independent judg	gment of the City of Riverside	t, it is	
The City of Riverside finds that the proposed project COULD NOT have a significant effect on the environment, and a NEGATIVE DECLARATION will be prepared.				
The City of Riverside finds that although the proposed project could have a significant effect on the environment, there will not be a significant effect in this case because revisions in the project have been made by or agreed to by the project proponent. A MITIGATED NEGATIVE DECLARATION will be prepared.				
The City of Riverside finds that the prop ENVIRONMENTAL IMPACT REPORT	osed project MAY have a significant effect is required.	ct on the environment, and an		
The City of Riverside finds that the proposed project MAY have a "potentially significant impact" or "potentially significant unless mitigated" impact on the environment, but at least one effect 1) has been adequately analyzed in an earlier document pursuant to applicable legal standards, and 2) has been addressed by mitigation measures based on the earlier analysis as described on attached sheets. An ENVIRONMENTAL IMPACT REPORT is required, but it must analyze only the effects that remain to be addressed.				
The City of Riverside finds that although the proposed project could have a significant effect on the environment, because all potentially significant effects (a) have been analyzed adequately in an earlier EIR or NEGATIVE DECLARATION pursuant to applicable standards, and (b) have been avoided or mitigated pursuant to that earlier EIR or NEGATIVE DECLARATION, including revisions or mitigation measures that are imposed upon the proposed project, nothing further is required.

Environmental Initial Study

EVALUATION OF ENVIRONMENTAL IMPACTS:

- A brief explanation is required for all answers except "No Impact" answers that are adequately supported by the information sources a lead agency cites in the parentheses following each question. A "No Impact" answer is adequately supported if the referenced information sources show that the impact simply does not apply to projects like the one involved (e.g., the project falls outside a fault rupture zone). A "No Impact" answer should be explained where it is based on project-specific factors as well as general standards (e.g., the project will not expose sensitive receptors to pollutants, based on a project-specific screening analysis).
- 2) All answers must take account of the whole action involved, including off-site as well as on-site, cumulative as well as project-level, indirect as well as direct, and construction as well as operational impacts.
- 3) Once the lead agency has determined that a particular physical impact may occur, then the checklist answers must indicate whether the impact is potentially significant, less than significant with mitigation, or less than significant. "Potentially Significant Impact" is appropriate if there is substantial evidence that an effect may be significant. If there are one or more "Potentially Significant Impact" entries when the determination is made, an EIR is required.
- 4) "Negative Declaration: Less Than Significant With Mitigation Incorporated" applies where the incorporation of mitigation measures has reduced an effect from "Potentially Significant Impact" to a "Less Than Significant Impact." The lead agency must describe the mitigation measures, and briefly explain how they reduce the effect to a less than significant level (mitigation measures from "Earlier Analyses," as described in (5) below, may be cross-referenced).
- Earlier analyses may be used where, pursuant to the tiering, program EIR, or other CEQA process, an effect has been adequately analyzed in an earlier EIR or negative declaration. Section 15063(c)(3)(D). In this case, a brief discussion should identify the following:
 - a. Earlier Analysis Used. Identify and state where they are available for review.
 - b. **Impacts Adequately Addressed.** Identify which effects from the above checklist were with in the scope of and adequately analyzed in an earlier document pursuant to applicable legal standards, and state whether such effects were addressed by mitigation measures based on the earlier analysis.
 - c. **Mitigation Measures.** For effects that are "Less than Significant with Mitigation Measures Incorporated," describe the mitigation measure which were incorporated or refined from the earlier document and the extent to which they address site-specific conditions for the project.
- 6) Lead agencies are encouraged to incorporate into the checklist references to information sources for potential impacts (e.g., general plans, zoning ordinances). Reference to a previously prepared or outside document should, where appropriate, include a reference to the page or pages where the statement is substantiated.

- 7) Supporting Information Sources: A source list should be attached, and other sources used or individuals contacted should be cited in the discussion.
- 8) The explanation of each issue should identify:
 - a. the significance criteria or threshold, if any, used to evaluate each question; and
 - b. the mitigation measure identified, if any, to reduce the impact to less than significance.

ISSUES (AND SUPPORTING	Potentially Significant	Less Than Significant	Less Than Significant	No Impact
INFORMATION SOURCES):	Impact	With	Impact	Impact
		Mitigation Incorporated		
1. AESTHETICS. Would the project:		•		
a. Have a substantial adverse effect on a scenic vista?			\boxtimes	
1a. Response: (Source: General Plan 2025 Figure CCM-4 – Figure 5.1-1 – Scenic and Special Boulevards and Parkwa Table 5.1-B – Scenic Parkways) The project site will facilitate the future development of 6 residentia 13000 Zone, any future development of single family homes will standards. Further, a condition of approval will require the submittate each lot. The Design Review process will further ensure that the surrounding area and all applicable development standards. As the the future development of up to 6 single family residences in comparones and any applicable conditions of approval will not have an proposed project will have less than significant impacts to a scenic b. Substantially damage scenic resources, including, but not limited to, trees, rock outcroppings, and historic buildings	I lots. Since to require compal of a separate single familiance with the adverse effections.	he project site liance with the Administrati ily homes wi ly surrounded e development	will be locate the R-1-13000 we Design Revall be compating by suburban of the standards of	ed in the R-1- development view case for ble with the development, the proposed
within a state scenic highway?				
1b. Response: (Source: General Plan 2025 Figure CCM-4 – Master Plan of Roadways, General Plan 2025 FPEIR Figure 5.1-1 – Scenic and Special Boulevards, Parkways, Table 5.1-A – Scenic and Special Boulevards, Table 5.1-B – Scenic Parkways, the City's Urban Forest Tree Policy Manual, Title 20 – Cultural Resources and, Title 19 – Article V – Chapter 19.100 – Residential Zones - RC Zone, Historical/Archaeological Resources Survey Report prepared by CRM Tech, dated January 28, 2015) There are no scenic highways within the City that could potentially be impacted. In addition the proposed project is not located along or within view of a scenic boulevard, parkway or special boulevard as designated by the City's General Plan 2025 and therefore will not have any effect on any scenic resources within a scenic roadway. Compliance with the City's Urban Forest Tree Policy Manual, scenic resources will be protected and even enhanced. The Zoning Code regulates building setbacks, building heights, land uses, landscaping, parking and other development standards for use and development of all properties. Lastly, a Cultural Resources Assessment was prepared, indicating that the site, including the prehistoric components (rock outcroppings) do not appear to qualify as historic resources. Based upon CRM Tech's inquiry through a NAHC letter to 25 tribes, dated July 31, 2014, as noted in the assessment report the results of archaeological research indicates that milling features, were identified and recorded within the project area, but it did not meet CEQA's definition of a "historical resource". However, the project has been conditioned to have native American and archaeological monitors present during grading. Therefore, any future grading, trenching, excavations and/or other earth moving activities on the property shall be monitored by a qualified archaeologist to ensure proper treatment of any new finds. This project complies with or will be required to comply with these standards. Therefore, direct, indirect or cumulative impacts				
c. Substantially degrade the existing visual character or quality of the site and its surroundings?				
1c. Response: (Source: General Plan 2025, General Plan 20 Guidelines)			•	
The proposed project is required to implement the General Plan 2 Review consistent with established Citywide Design and Sign Gu cumulative impacts on the visual character and quality of the area are	idelines. Due	to all these f	actors, direct,	
d. Create a new source of substantial light or glare which would adversely affect day or nighttime views in the area?				
1d. Response: (Source: General Plan 2025, General Plan 2025 Area, Title 19 - Article VIII - Chapter 19.556 - Lighting, Common The subsequent development of up to 6 single family residences wassociated with residential development. This lighting will be similar not be considered significant. Additionally, the site is not within the Deeft Environmental Initial Study. INFORMATION SOURCES):	Impact	With Mitigation	Impact	Impact
		Incorporated		
than significant.				
2. AGRICULTURE AND FOREST RESOURCES:				
In determining whether impacts to agricultural resources are significant environmental effects, lead agencies may refer to the California Agricultural Land Evaluation and Site Assessment Model (1997) prepared by the California Dept. of Conservation as an optional model to use in assessing impacts on agriculture and farmland. In determining whether impacts to forest resources, including timberland, are significant environmental effects, lead agencies may refer to information complied by the California Department of Forestry and Fire Protection regarding the state's inventory of forest land, including the Forest and Range Assessment Project and the Forest Legacy Assessment project; and the forest carbon measurement methodology provided in the Forest Protocols adopted by the California Air Resources Board. Would the project:				
a. Convert Prime Farmland, Unique Farmland, or Farmland of Statewide Importance (Farmland), as shown on the maps prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency, to non-agricultural use?				
2a. Response: (Source: General Plan 2025 – Figure OS-2 – Agricultural Suitability & General Plan 2025 FPEIR – Appendix I – Designated Farmland Table) The Project is located within an urbanized area. A review of Figure OS-2 – Agricultural Suitability of the General Plan 2025 reveals that the project site is not designated as Prime Farmland, Unique Farmland, or Farmland of Statewide Importance, as shown on the maps prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency. Therefore, the project will have no impact directly, indirectly or cumulatively to agricultural uses.				
b. Conflict with existing zoning for agricultural use, or a Williamson Act contract?				
2b. Response: (Source: General Plan 2025 – Figure OS-3 - Williamson Act Preserves, General Plan 2025 FPEIR – Figure 5.2-4 – Proposed Zones Permitting Agricultural Uses, and Title 19) A review of Figure 5.2-2 – Williamson Act Preserves of the General Plan 2025 FPEIR reveals that the project site is not located within an area that is affected by a Williamson Act Preserve or under a Williamson Act Contract. Moreover, the project site is not zoned for agricultural use and is not next to land zoned for agricultural use; therefore, the project will have no impact directly, indirectly or cumulatively.				
c. Conflict with existing zoning for, or cause rezoning of, forest land (as defined in Public Resources Code section 12220(g)) timberland (as defined in Public Resources Code section 4526), or timberland zoned Timberland Production (as defined by Government Code section 51104(g))?				
2c. Response: (Source: GIS Map – Forest Data) The City of Riverside has no forest land that can support 10-perce. Therefore, no impacts will occur from this project directly, indirectly			es it have any	timberland.

ISSUES (AND SUPPORTING	Potentially Significant	Less Than Significant	Less Than Significant	No Impact
INFORMATION SOURCES):	Impact	With Mitigation Incorporated	Impact	- Impact
d. Result in the loss of forest land or conversion of forest land to non-forest use?				\boxtimes
2d. Response: (Source: GIS Map – Forest Data) The City of Riverside has no forest land that can support 10-perce therefore no impacts will occur from this project directly, indirectly			es it have any	y timberland,
e. Involve other changes in the existing environment which, due to their location or nature, could result in conversion of Farmland, to non-agricultural use or conversion of forest land to non-forest use?		, 🗆		\boxtimes

b. Result in substantial soil erosion or the loss of topsoil?			\boxtimes	
6b. Response: (Source: General Plan 2025 FPEIR Figure 5. Soils, Table 5.6-B - Soil Types, Title 18 - Subdivision Co		-		-

ISSUES (AND SUPPORTING	Potentially Significant	Less Than Significant	Less Than Significant	No Impact	
INFORMATION SOURCES):	Impact	With	Impact	impact	
		Mitigation Incorporated			
acre: SWPPP)					
Erosion and loss of topsoil could occur as a result of the project. State and Federal requirements call for the preparation and implementation of a Storm Water Pollution Prevention Plan (SWPPP) establishing erosion and sediment controls for construction activities. The project must also comply with the National Pollutant Discharge Elimination System (NPDES) regulations. In addition, with the erosion control standards for which all development activity must comply (Title 18), the Grading Code (Title 17) also requires the implementation of measures designed to minimize soil erosion. Compliance with State and Federal requirements as well as with Titles 18 and 17 will ensure that soil erosion or loss of topsoil will be less than significant impact directly, indirectly and cumulatively.					
c. Be located on a geologic unit or soil that is unstable, or that would become unstable as a result of the project, and potentially result in on- or off-site landslide, lateral spreading, subsidence, liquefaction or collapse?					
6c. Response: (Source: General Plan 2025 Figure PS-1 - Regional Fault Zones, Figure PS-2 - Liquefaction Zones, General Plan 2025 FPEIR Figure PS-3 - Soils with High Shrink-Swell Potential, Figure 5.6-1 - Areas Underlain by Steep Slope, Figure 5.6-4 - Soils, Table 5.6-B - Soil Types, and Appendix E - Geotechnical Report, Project Specific Geotechnical Report prepared by Geo-Environmental, Inc.) The average natural slope of the subject site is 14.3 percent. As designed the project complies with all of development standards of Title 17 - Grading Code without the need for grading exceptions. Further, compliance with the City's existing codes and the policies contained in the General Plan 2025 help to ensure that impacts related to geologic conditions are reduced to less than significant impacts level directly, indirectly and cumulatively.					
d. Be located on expansive soil, as defined in Table 18-1-B of the Uniform Building Code (1994), creating substantial risks to life or property?			\boxtimes		
6d. Response: (Source: General Plan 2025 FPEIR Figure 5 Types, Figure 5.6-5 – Soils with High Shrink-Swell Potenti Building Code as adopted by the City of Riverside and set of	al, Appendix ut in Title 16	E – Geotechn of the Riversid	ical Report, ai de Municipal (nd California Code)

f. Otherwise substantially degrade water quality?					
9f. Response: (Source: Project Specific – Stormwater Pollution Prevention Plan, Project Specific Water Quality Management Plan prepared by EGL Associates, Inc., dated August 30, 2013) The project is over one are in size and is required to have coverage under the State's General Permit for Construction Activities (SWPPP). As stated in the Permit, during and after construction, best management practices (BMPs) will be implemented to reduce/eliminate adverse water quality impacts resulting from development. Furthermore, the City has ensured that the development does not cause adverse water quality impacts, pursuant to its Municipal Separate Storm System (MS4) permit through the project's WQMP. The proposed development will increase the amount of impervious surface area in the City. This impervious area includes paved parking areas, sidewalks, roadways, and building rooftops; all sources of runoff that may carry pollutants and therefore has the potential to degrade water quality. This development has been required to prepare preliminary BMP's that have been reviewed and approved by Public Works. Final BMP's will be required prior to grading permit issuance. The purpose of this requirement is to insure treatment BMP's are installed/constructed as part of the project so that the pollutants generated by the project will be treated in perpetuity. Therefore, impacts related to degrading water quality are less than significant directly, indirectly and cumulatively.					
g. Place housing within a 100-year flood hazard area as mapped on a federal Flood Hazard Boundary or Flood Insurance Rate Map or other flood hazard delineation map? Draft Environmental Initial Study 14		P14-0244, P15	_0085_0088_P	15-0089-0092

circulation and connectivity consistent with the General Plan 2025, and Subdivision Codes. Therefore, the project impacts related to the		ance with the		of the Zoning	
c. Conflict with any applicable habitat conservation plan or natural community conservation plan?					
10c. Response: (Source: General Plan 2025, General Plan 2025 – Figure LU-10 – Land Use Policy Map, Table LU-5 – Zoning/General Plan Consistency Matrix, Figure LU-7 – Redevelopment Areas, enter appropriate Specific Plan if one, Title 19 – Zoning Code, Title 18 – Subdivision Code, Title 7 – Noise Code, Title 17 – Grading Code, Title 20 – Cultural Resources Code, Title 16 – Buildings and Construction and Citywide Design and Sign Guidelines					
The proposed project is consistent with the guidelines of MSHCP, including Section 6.1.4, Guidelines Pertaining to the Urban/Wildlife Interface and related policies in the General Plan 2025, including Policy LU-7.4. As well, the project is consistent with the SKR HCP and with General Plan Policy OS-5.3. Impacts will be less than significant directly, indirectly and cumulatively to the provisions of an adopted Habitat Conservation Plan, Natural Community Conservation Plan, or other approved local, regional, or State habitat conservation plan.					
11. MINERAL RESOURCES. Would the project:					
a. Result in the loss of availability of a known mineral resource that would be of value to the region and the residents of the state?					
11a. Response: (Source: General Plan 2025 Figure – OS-1 – Mineral Resources) The proposed project is within Mineral Resources area MRZ-3. The quarrying of have not been active for decades and most extraction sites are now beyond the urban periphery. Therefore, the project as proposed has less than significant impact directly, indirectly and cumulatively in the loss of known mineral resources that would be of value to the region and the residents of the state.					
b. Result in the loss of availability of a locally-important mineral resource recovery site delineated on a local general plan, specific plan or other land use plan?					
11b. Response: (Source: General Plan 2025 Figure – OS-1 – Mineral Resources) The GP 2025 FPEIR determined that there are no specific areas with the City of Sphere Area which have locally-important mineral resource recovery sites and that the implementation of the General Plan 2025 would not significantly preclude the ability to extract state-designated resources. The proposed project is consistent with the General Plan 2025. Therefore, there is no impact.					
12. NOISE. Would the project result in:					
a. Exposure of persons to or generation of noise levels in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies?					
12a. Response: (Source: General Plan Figure N-1 – 2003 Roadway Noise, Figure N-2 – 2003 Freeway Noise, Figure N-3 – 2003 Railway Noise, Figure N-5 – 2025 Roadway Noise, Figure N-6 – 2025 Freeway Noise, Figure N-7 – 2025 Railroad Noise, Figure N-8 – Riverside and Flabob Airport Noise Contours, Figure N-9 – March ARB Noise Contours, Figure N-10 – Noise/Land Use Noise Compatibility Criteria, FPEIR Table 5.11-1 – Existing and Future Noise Contour Comparison, Table 5.11-E – Interior and Exterior Noise Standards, Appendix G – Noise Existing Conditions Report, Title 7 – Noise Code, Noise Impact Analysis prepared by LSA, dated January 2015) The future development of up to 6 single family residences is not anticipated to cause long-term increases in ambient noise					
levels. However, an acoustical analysis was prepared for the project concludes that the project has the potential to expose persons to	t by LSA, dat	ed January 20	15. The acous	tical analysis

b. Exposure of persons to or generation of excessive groundborne vibration or groundborne noise levels?					
12b. Response: (Source: General Plan Figure N-1 - 2003 Roadway Noise, Figure N-2 - 2003 Freeway Noise, Figure N-3 - 2003 Railway Noise, Figure N-5 - 2025 Roadway Noise, Figure N-6 - 2025 Freeway Noise, Figure N-7 - 2025 Railroad Noise, Figure N-8 - Riverside and Flabob Airport Noise Contours, Figure N-9 - March ARB Noise Contours, FPEIR Table 5.11-G - Vibration Source Levels For Construction Equipment, Appendix G - Noise Existing Conditions Report, Noise Impact Analysis prepared by LSA, dated January 2015) Construction related activities although short term, are the most common source of groundborne noise and vibration that could affect occupants of neighboring uses. While intermittent, train vibration is also a significant source of groundborne noise and vibration. Since this project is located next to railroad tracks and will involve short term construction activities an acoustical analysis was prepared by LSA in January 2015. The acoustical analysis has assessed the potential for noise and ground-borne vibration impacts related to noise land use compatibility, construction-related noise per GP 2025 FPEIR, Table 5.11-G, Vibration Source Levels for Construction Equipment, on-site stationary noise sources, and vehicular-related noise. The acoustical analysis found the project to be in compliance with the City's noise standards and found impacts related to groundborne vibration and groundborne noise levels as a result of the project to be less than significant directly, indirectly and cumulatively					
c. A substantial permanent increase in ambient noise levels in the project vicinity above levels existing without the project?					
12c. Response: (Source: General Plan Figure N-1 - 2003 A Figure N-3 - 2003 Railway Noise, Figure N-5 - 2025 Road N-7 - 2025 Railroad Noise, Figure N-8 - Riverside and ARB Noise Contours, Figure N-10 - Noise/Land Use Existing and Future Noise Contour Comparison, Tabl Appendix G - Noise Existing Conditions Report, Title 7 - N	dway Noise, F Flabob Airpo Noise Compa e 5.11-E – 1	igure N-6 – 2 rt Noise Cont tibility Criter	025 Freeway I ours, Figure I ia, FPEIR To	Noise, Figu N-9 – Marc able 5.11-I

INFORMATION SOURCES):	Impact	With	Impact	Impact		
,		Mitigation Incorporated				
The future development of up to 6 single family residences is not anticipated to cause long-term increases in ambient noise levels. However, development of the property in the manner proposed could result in temporary increases in noise levels, primarily during construction. These activities will be subject to compliance with the City's Noise Ordinance and no significant impacts would occur.						
d. A substantial temporary or periodic increase in ambient noise levels in the project vicinity above levels existing without the project?		\boxtimes				
12d. Response: (Source: FPEIR Table 5.11-J – Construction I Conditions Report)	Equipment No	oise Levels, Ap	ppendix G – N	oise Existing		
The primary source of temporary or periodic noise associated with maintenance work. Construction noise typically involves the loudes demolition, grading and construction.						
Both the General Plan 2025 and Municipal Code Title 7 (Noise Code) limit construction activities to specific times and days of the week and during those specified times, construction activity is subject to the noise standards provided in the Title 7. Furthermore, the Noise Impact Analysis prepared by LSA in January 2015 incorporates mitigation measures for short-term construction related activities and long-term noise from traffic on the project to reduce both noise levels to an acceptable standard that meets those in the Boise Ordinance. Therefore, temporary or periodic noise levels will be less than significant with mitigation directly, indirectly and cumulatively for this project. Noise 1: During all project site excavation and grading on site, the project contractors shall equip all construction equipment, fixed or mobile, with properly operating and maintained mufflers consistent with manufactures' standards.						
Noise 2: The project contractor shall place all stationary construct from sensitive receptors nearest the project site.						
Noise 3: The contractor shall locate equipment staging in areas that related noise sources and noise-sensitive receptors nearest the projec				construction-		
e. For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project expose people residing or working in the project area to excessive noise levels?						
12e. Response: (Source: General Plan 2025 Figure N-8 – Riverside and Flabob Airport Noise Contours, Figure N-9 – March ARB Noise Contour, Figure N-10 – Noise/Land Use Noise Compatibility Criteria, RCALUCP, March Air Reserve Base/March inland Port Comprehensive Land Use Plan (1999), Air Installation Compatible Use Zone Study for March Air Reserve Base (August 2005))						
The proposed project is located within Safety and/or Airport Compatibility Zone E as depicted on Figure 5.7-2 of the General Plan 2025 Program FPEIR for March Air Reserve Base as noted in the Riverside County Airport Land use Compatibility Plan (RCALUCP). The project is in compliance with the land use standards in the RCALUP therefore the project has been found to be less than significant impacts directly, indirectly and cumulatively.						
f. For a project within the vicinity of a private airstrip, would the project expose people residing or working in the project area to excessive noise levels?

14. PUBLIC SERVICES.		Incorporated		
Would the project result in substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities, need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times or other performance objectives for any of the public services:				
a. Fire protection?				
14a. Response: (Source: FPEIR Table 5.13-B - Fire Station Statistics and Ordinance 5948 § 1) The project consists of a 6 lot subdivision. Adequate fire facilities located at 6674 Alessandro Boulevard to serve this project. In additional compliance with existing codes and standards, and through Fire Design of the state of the st	s and services on, with imple	are provided ementation of (actices, there	by two statio General Plan 2	ns; Station 9
demand for additional fire facilities or services either directly, indire b. Police protection?	ctly or cumula	atively.		\square
14b. Response: (Source: General Plan 2025 Figure PS-8 – Ne	ighborhood P	olicina Center	·c)	
The project consists of a 6 lot subdivision. Adequate police facilities and services are provided by the East Neighborhood Policing Center to serve this project. In addition, with implementation of General Plan 2025 policies, compliance with existing codes and standards, and through Police Department practices, there will be no impact on the demand for additional police facilities of services either directly, indirectly or cumulatively.				
c. Schools?			\boxtimes	
14c. Response: (Source: FPEIR Figure 5.13-2 – RUSD Boundaries, Table 5.13-D – RUSD, Figure 5.13-3 – AUSD Boundaries, Table 5.13-E – AUSD, Table 5.13-G – Student Generation for RUSD and AUSD By Education Level, and Figure 5.13-4 – Other School District Boundaries) The project consists of a 6 lot subdivision. Adequate school facilities and services are provided by the Riverside Unified School District to serve this project. In addition, with implementation of General Plan 2025 policies, compliance with existing codes and standards, and through Riverside Unified School District School District impact fees used to offset the impact of new development, there will be less than significant impacts on the demand for school facilities or services either directly, indirectly or cumulatively.				
d. Parks?			\boxtimes	
14d. Response: (Source: General Plan 2025 Figure PR-1 – Parks, Open Spaces and Trails, Table PR-4 – Park and Recreation Facilities, Parks Master Plan 2003, GP 2025 FPEIR Table 5.14-A – Park and Recreation Facility Types, and Table 5.14-C – Park and Recreation Facilities Funded in the Riverside Renaissance Initiative) The project consists of a 6 lot subdivision. Adequate park facilities and services are provided in the Victoria Neighborhood to serve this project. In addition with implementation of General Plan 2025 policies, compliance with existing codes and standards, and through Park, Recreation and Community Services practices, there will be less than significant impacts on the demand for additional park facilities or services either directly, indirectly or cumulatively.				
e. Other public facilities?				\boxtimes
14e. Response: (Source: General Plan 2025 Figure LU-8 – Community Facilities, FPEIR Figure 5.13-5 - Library Facilities, Figure 5.13-6 - Community Centers, Table 5.3-F – Riverside Community Centers, Table 5.13-H – Riverside Public Library Service Standards) The project consists of a 6 lot subdivision. Adequate public facilities and services, including libraries and community centers, are provided in the Victoria Neighborhood to serve this project. In addition, with implementation of General Plan 2025 policies, compliance with existing codes and standards, and through Park and Recreation and Community Services				
and Library practices, there will be no impacts on the demand for indirectly or cumulatively.	additional pu	ıblic facilities	or services ei	ther directly,

Proposed General Plan, Appendix H – Circulation I SCAG's RTP)	мет 1 гајј	ic Siuay ana	Trajjie Siud	iy Appenaix,		
SCAG's RTP) This project involves the future construction of up to 6 new single family residences and thus will result in a minimal increase in vehicular trips onto existing local streets both during and after construction. The proposed project will not generate additional vehicular trips either directly or indirectly, other than what has already been considered under the City's General Plan. Also, since this proposal will not generate a significant number of additional vehicle trips the LOS of nearby intersection will not be affected. Therefore, no significant change to the levels of service of nearby intersections and only an incremental increase of traffic load or capacity are expected with implementation of this project and the project's individual or cumulative impact to all applicable plans, ordinances or policies pertaining to the performance of the circulation system based upon the accessed levels in the adopted General Plan 2025, will be less than significant .						
c. Result in a change in air traffic patterns, including either an			Π̈́			
increase in traffic levels or a change in location that results in substantial safety risks?]				
16c. Response: (Source: General Plan 2025 Figure PS-6 - A						
March Air Reserve Base/March Inland Port Compreh		Use Plan (1999)and Air	· Installation		
Compatible Use Zone Study for March Air Reserve Base (August 2005)) The proposed project is located in Zone E of RCALUCP for MARB CLUP/JLUS and has been designed to be consistent with this plan. The project will not change air traffic patterns, increase air traffic levels or change the location of air traffic patterns. It is not located within an airport influence area. As such, this project will have no impact directly, indirectly or cumulatively on air traffic patterns.						
d. Substantially increase hazards due to a design feature (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g., farm equipment)?						
16d. Response: (Source: Project Site Plans, Lane Striping and Signing Plans) The proposed project is compatible with adjacent existing uses and street configurations. As well, it has been designed so as not to cause any incompatible use or additional or any hazards to the surrounding area or general public. As a condition of approval, the proposed cul-de-sac, all proposed driveways, sidewalks, walls/fences, and landscaping will be required comply with the applicable development standards of the Riverside Municipal Code. Therefore, this project will have a less than significant impact on increasing hazards through design or incompatible uses directly, indirectly or cumulatively.						
e. Result in inadequate emergency access?			\boxtimes			
16e. Response: (Source: California Department of Transport Fire Code)	_	-	_	·		
The project has been developed in compliance with Title 18, Section 18.210.030 and the City's Fire Code Section 503 (California Fire Code 2007); therefore, there will be a less than a significant impact directly, indirectly or cumulatively to emergency access.						
f. Conflict with adopted policies, plans or programs regarding public transit, bicycle, or pedestrian facilities, or otherwise decrease the performance or safety of such facilities)?						
decrease the performance or safety of such facilities)? 16f. Response: (Source: FPEIR, General Plan 2025 Land Use and Urban Design, Circulation and Community Mobility and Education Elements, Bicycle Master Plan, School Safety Program – Walk Safe! – Drive Safe!) The project, as designed, does not create conflicts with adopted policies, plans or programs supporting alternative transportation (e.g. bus turnouts, bicycle racks). As such, the project will have no impact directly, indirectly or cumulatively on adopted policies, plans, or programs supporting alternative transportation.						

ISSUES (AND SUPPORTING INFORMATION SOURCES):	Potentially Significant Impact	Less Than Significant With Mitigation	Less Than Significant Impact	No Impact	
		Incorporated			
17. UTILITIES AND SYSTEM SERVICES. Would the project:					
a. Exceed wastewater treatment requirements of the applicable Regional Water Quality Control Board?					
17a. Response: (Source: General Plan 2025 Figure PF-2 – Sewer Facilities Map, FPEIR Figure 5.16-5 – Sewer Service Areas, Table 5.16-K - Estimated Future Wastewater Generation for the City of Riverside's Sewer Service Area, Table 5.16-L - Estimated Future Wastewater Generation for the Planning Area Served by WMWD, Figure 5.8-1 – Watersheds, Wastewater Integrated Master Plan and Certified EIR)					
All new development is required to comply with all provisions of the NPDES program and the City's Municipal Separate Sewer Permit (MS4), as enforced by the Regional Water Quality Control Board (RWQCB). Therefore, the proposed project would not exceed applicable wastewater treatment requirements of the RWQCB with respect to discharges to the sewer system or stormwater system within the City. Because the proposed project is required to adhere to the above regulations related to wastewater treatment the project will have a less than significant impact .					
b. Require or result in the construction of new water or wastewater treatment facilities or expansion of existing facilities, the construction of which could cause significant environmental effects?					
17b. Response: (Source: General Plan 2025 Table PF-1 – RP Table PF-2 – RPU Projected Water Demand, Table P Domestic Water Supply (AC-FT/YR), RPU, FPEIR Table RPU Including Water Reliability for 2025, Table 5.16-I - C J - General Plan Projected Water Demand for WMWI Estimated Future Wastewater Generation for the City of Estimated Future Wastewater Generation for the Planni Facilities and Figure 5.16-6 – Sewer Infrastructure and Wood The project as proposed, is consistent with the approved General Pland uses, thus the project and upgrade of the sewer pumps are cons Plan 2025 where future water and wastewater generation was deter G, 5.16-H, 5.16-I, 5.16-J and 5.16-K of the General Plan 2025 Fir resulting in the construction of new water or wastewater treatment indirectly or cumulatively.	F-3 – Wester 5.16-G – Gerent and Property of Riverside's fing Area Servatewater Interpretation 2025 and distent with the mined to be adal PEIR). The	rn Municipal neral Plan Pr rojected Wate Water Reliable Sewer Service wed by WMW grated Master oes not exceed Typical Grow dequate (see T erefore, the pr	Water Distrojected Water r Use WMWL ility 2025, Take to Area & Top Figure 5.12 Plan and Cerl the densities with Scenario of ables 5.16-E, soject will have	ict Projected Demand for D, Table 5.16-K- able 5.16-L- 16-4 – Water rtified EIR.) for the LDR f the General 5.16-F, 5.16- e no impact	
c. Require or result in the construction of new storm water drainage facilities or expansion of existing facilities, the construction of which could cause significant environmental effects?					
17c. Response: (Source: FPEIR Figure 5.16-2 - Drainage Facilities) The increase in impervious surface area resulting from construction of the 6 single family residences facilitated by this project will generate increased storm water flows with potential to impact drainage facilities and require the provision of additional facilities. However, the Subdivision Code (Title 18, Section 18.48.020) requires drainage fees to be paid to the City for new construction. Fees are transferred into a drainage facilities fund that is maintained by Riverside County Flood Control and Water Conservation District. This Section also complies with the California Government Code (section 66483), which provides for the payment of fees for construction of drainage facilities. Fees are required to be paid as part of the conditions of approval/waiver for filing of a final map or parcel map. General Plan 2025 Policies PF 4.1 and PF 4.3 require the City to continue to routinely monitor its storm drain system and to fund and improve those systems as identified in the City's Capital Improvement plan. Implementation of these policies will ensure that the City is adequately served by drainage systems. The General Plan 2025 also includes policies and programs that will minimize the environmental effects of the development of such facilities. Therefore, the project will have less than significant impacts storm water drainage facilities that would not require the expansion of existing facilities directly, indirectly or cumulatively.					
d. Have sufficient water supplies available to serve the project from existing entitlements and resources, or are new or expanded entitlements needed?					

ISSUES (AND SUPPORTING INFORMATION SOURCES):	Potentially Significant Impact	Less Than Significant With Mitigation	Less Than Significant Impact	No Impact
		Incorporated		
17d. Response: (Source: FPEIR Figure 5.16-3 – Water Service Areas, Figure 5.16-4 – Water Facilities, Table 5.16-E – RPU Projected Domestic Water Supply (AC-FT/YR, Table 5.16-F – Projected Water Demand, Table 5.16-G – General Plan Projected Water Demand for RPU including Water Reliability for 2025, Table 5.16-H – Current and Projected Domestic Water Supply (acre-ft/year) WMWD Table 5.16-I Current and Projected Water Use WMWD, Table 5.16-J – General Plan Projected Water Demand for WMWD Including Water Reliability 2025, RPU Master Plan, EMWD Master Plan, WMWD Master Plan, and Highgrove Water District Master Plan) The project will not exceed expected water supplies. The project is consistent with the General Plan 2025 Typical Growth Scenario where future water supplies were determined to be adequate (see Tables t.16-E, 5.16-F, 5.16-G, 5.16-H, 5.16-I and 5.16-J of the General Plan 2025 Final PEIR). Therefore, the project will have no impact resulting in the insufficient water supplies either directly, indirectly or cumulatively.				
e. Result in a determination by the wastewater treatment provider which serves or may serve the project that it has adequate capacity to serve the project's projected demand in addition to the provider's existing commitments?				
17e. Response: (Source: FPEIR Figure 5.16-5 - Sewer Service Areas, Figure 5.16-6 - Sewer Infrastructure, Table 5.16-K - Estimated Future Wastewater Generation for the City of Riverside's Sewer Service Area, Table 5.16-L - Estimated Future Wastewater Generation for the Planning Area Served by WMWD, and Wastewater Integrated Master Plan and Certified EIR) The project will not exceed wastewater treatment requirements of (Regional Water Quality Control Board). The project is consistent with the General Plan 2025 Typical Growth Scenario where future wastewater generation was determined to be adequate (see Table 5.16-K of the General Plan 2025 Final PEIR). Further, the current Wastewater Treatment Master Plan anticipates and provides for this type of project. Therefore, no impact to wastewater treatment directly, indirectly or cumulatively will occur.				
f. Be served by a landfill with sufficient permitted capacity to accommodate the project's solid waste disposal needs?				
17f. Response: (Source: FPEIR Table 5.16-A – Existing Landfills and Table 5.16-M – Estimated Future Solid Waste Generation from the Planning Area) The project is consistent with the General Plan 2025 Typical Build-out Project level where future landfill capacity was determined to be adequate (see Tables 5.16-A and 5.16-M of the General Plan 2025 Final PEIR). Therefore, no impact to landfill capacity will occur directly, indirectly or cumulatively.				
g. Comply with federal, state, and local statutes and regulations related to solid waste?				\boxtimes
17g. Response: (Source: California Integrated Waste Management Board 2002 Landfill Facility Compliance Study) The California Integrated Waste Management Act under the Public Resource Code requires that local jurisdictions divert at least 50% of all solid waste generated by January 1, 2000. The City is currently achieving a 60% diversion rate, well above State requirements. In addition, the California Green Building Code requires all developments to divert 50% of non-hazardous construction and demolition debris for all projects and 100% of excavated soil and land clearing debris for all non-residential projects beginning January 1, 2011. The proposed project must comply with the City's waste disposal requirements as well as the California Green Building Code and as such would not conflict with any Federal, State, or local regulations related to solid waste. Therefore, no impacts related to solid waste statutes will occur directly, indirectly or cumulatively.				

ISSUES (AND SUPPORTING INFORMATION SOURCES):	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact	
18. MANDATORY FINDINGS OF SIGNIFICANCE.					
a. Does the project have the potential to degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, reduce the number or restrict the range of a rare or an endangered plant or animal or eliminate important examples of the major periods of California history or prehistory?					
18a. Response: (Source: General Plan 2025 – Figure OS-6 – Stephen's Kangaroo Rat (SKR) Core Reserve and Other Habitat Conservation Plans (HCP), Figure OS-7 – MSHCP Cores and Linkages, Figure OS-8 – MSHCP Cell Areas, General Plan 2025 FPEIR Figure 5.4-2 – MSHCP Area Plans, Figure 5.4-4 - MSHCP Criteria Cells and Subunit Areas, Figure 5.4-6 – MSHCP Narrow Endemic Plant Species Survey Area, Figure 5.4-7 – MSHCP Criteria Area Species Survey Area, Figure 5.4-8 – MSHCP Burrowing Owl Survey Area, MSHCP Section 6.1.2 - Protection of Species Associated with Riparian/Riverine Areas and Vernal Pools, and Habitat Assessment prepared by Osborne Biological Consulting on January 25, 2013, FPEIR Table 5.5-A Historical Districts and Neighborhood Conservation Areas, Figure 5.5-1 - Archaeological Sensitivity, Figure 5.5-2 - Prehistoric Cultural Resources Sensitivity, Appendix D, Title 20 of the Riverside Municipal Code) Potential impacts related to habitat of fish or wildlife species were discussed in the Biological Resources Section of this Initial Study, and were all found to be less than significant. Additionally, potential impacts to cultural, archaeological and paleontological resources related to major periods of California and the City of Riverside's history or prehistory were discussed in the Cultural Resources Section of this Initial Study, and were found to have less than significant impacts.					
b. Does the project have impacts that are individually limited, but cumulatively considerable? ("Cumulatively considerable" means that the incremental effects of a project are considerable when viewed in connection with the effects of past projects, the effects of other current projects, and the effects of probable future projects)?					
18b. Response: (Source: FPEIR Section 6 - Long-Term Effects/ Cumulative Impacts for the General Plan 2025 Program) Because the project is consistent with the General Plan 2025, no new cumulative impacts are anticipated and therefore cumulative impacts of the proposed project beyond those previously considered in the GP 2025 FPEIR are less than significant.					
c. Does the project have environmental effects which will cause substantial adverse effects on human beings, either directly or indirectly?					
18c. Response: (Source: FPEIR Section 5 – Environmental Im Effects on human beings were evaluated as part of the aesthetics, air and housing, hazards and hazardous materials, and traffic sections of with mitigation for Section 12, Noise. Based on the analysis and cause substantial adverse effects, directly or indirectly to human being that result from the proposed project are less than sign	quality, hydr this initial stu- conclusions ags. Monterey Board of Supervisors, 222 Cal.App.3d 1337 (1990).

Staff Recommended Mitigation Measures

Impact Category	Mitigation Measures	Implementation Timing	Responsible Monitoring Party ¹	Monitoring/Reporting Method
Noise	Noise 1 : During all project site excavation and grading on site, the project contractors shall equip all construction equipment, fixed or mobile, with properly operating and maintained mufflers consistent with manufactures' standards.	During Grading	Planning Division	Issuance of Grading Permit.
Noise	Noise 2: The project contractor shall place all stationary construction equipment so that emitted noise is directed away from sensitive receptors nearest the project site.	Prior to Grading and During Grading	Planning Division	Issuance of Grading Permit
Noise	Noise 3: The contractor shall locate equipment staging in areas that will create the greatest distance between construction-related noise sources and noise-sensitive receptors nearest the project site during all project construction.	Prior to Grading and During Grading	Planning Division	Issuance of Grading Permit
Noise	Noise 4: Air conditioning, a form of mechanical ventilation, would be required for all dwelling units on Lots 5 and 6 along Central Avenue to ensure that windows can remain closed for prolonged periods of time to maintain the interior noise standards.	Issuance of Building Permit	Planning and Building and Safety Division	Issuance of Building Permit
Noise	Noise 5: Any outdoor active use areas, such as patios or balconies, on the west or south side of the residential buildings facing Central Avenue and within 97 feet of the roadway centerline would need to be protected by a noise barrier with a minimum height of 6 feet. No mitigation measures are required for outdoor active use areas located on the east or north side of the residential buildings away from Central Avenue.	Prior to Construction of Residences on Lots 5 and 6	Planning Division	Issuance of Grading Permit or Issuance of Building Permit or Issuance of Wall and Fence Permits
