

Re-introducing SCRATCH

This March, the Riverside Public Library proudly announces the reboot of its popular Scratch coding workshop. Intended for beginning and intermediate Scratchers ages 8 to 16, the updated workshop will progress through a series of guided projects with a focus on game design and development, introducing Scratchers to a variety of programming concepts and challenges.

If you are new to Scratch, you can sign up for a free Scratch account at <https://scratch.mit.edu>. No experience necessary.

Check with your local library branch for details, or view the library's calendar of events for workshop dates and times, available online at http://www.riversideca.gov/library/calendar/current_calendar.pdf.

LET THE CODING BEGIN...AGAIN!
