GENERAL NOTES: SEWER CONSTRUCTION

- Construction shall be in accordance with the City of Riverside Department of Public Works, Standard Drawings, Standard Drawing No. 10 and the Standard Specifications for Public Works Construction, current edition.
- All sewer mains and laterals shall be extra strength vitrified clay pipe.
- Separation requirements between sewer and water lines shall conform to County Standard No. 609.
- Manhole construction shall conform to City of Riverside Standard Drawing No. 500.
- Sewer lateral construction shall conform to City of Riverside Standard Drawing No. 562.
- Grading over sewer mains shall be done in such a manner as to prevent ponding of water.
- It shall be the sewer contractor's responsibility to set manhole cover to finish grade after paving of street.
- Sewer profile elevations are to flowline (conduit invert).
- All pipe lengths are from centerline manhole to centerline manhole.
- Stationing of sewer is based on street centerline stationing.
- Quantities shown are for information only and the City of Riverside is not responsible for their accuracy.
- All flagged elevations shall be staked in the field by the private engineer.
- The private engineer signing these plans is responsible for assuring the accuracy and acceptability of the work hereon. In the event of discrepancies arising during construction, the private engineer shall be responsible for determining an acceptable solution and revising the plans for approval by the City. (This note required on all plans.)
- The contractor shall call in a location request to Underground Service Alert (USA), Phone No. 1-800-422-4133, two working days before digging. No construction permit will be issued by the Public Works Department involving excavation for underground facilities unless the applicant has been provided an inquiry identification number by U.S.A.
- Location of laterals to be determined in the field at the direction of the owner. Avoid conflict with proposed and/or existing facilities.
- No finished floor elevation shall be less than 4' above the sewer flow line at point of connection without having a proper backwater valve installed in the lateral.
