(PROCESS VALVES NOT SHOWN)

Pigeon Pass Lift Station Sequence of Operation

The Pump Station is equipped with three (3) pumps. The pump station will be utilized to pump wastewater from the wetwell to the next lift station downstream.

The pumps will be turned on or off by starters in a pump control panel, based on the level of wastewater in the wetwell as sensed by a level transducer.

The pumps are designated as P1, P2 and P3. The pump start sequence will be automatically alternated after each normal run cycle, i.e., the first cycle will be P1, P2, P3; then P2, P3, P1; then P3, P1, P2; and so on. The start/stop sequence is proposed as following:

	Start Sequence	Stop Sequence	Remarks
Normal Operation	Lead pump starts when wastewater level exceeds elev. 1088.60' Lag pump 1 starts when wastewater level exceeds elev. 1089.00' Lag pump 2 starts when wastewater level exceeds elev. 1089.42'	Lead pump stops when wastewater level drops below elev. 1083.90' Lag pump 1 stops when wastewater level drops below elev. 1083.30' Lag pump 2 stops when wastewater level drops below elev. 1085.00'	
Alarm Conditions	High level alarm activated when wastewater level exceeds elev. 1089.42' Low level alarm activated when wastewater level exceeds elev. 1083.50'	All alarm signals shall be acknowledged by remote or local control center, but can only be reset at local control center.	
Emergency Conditions	Any pump shall start when activated at the remote control center.	Any pump shall stop when deactivated at the remote control center.	
Alarm for pump operation	Power outage. Pump failure.	All alarm signals shall be acknowledged by remote or local control center, but can only be reset at local control center.	

NOTES:

1. THE LEVEL MEASURING DEVICE, LE–100, SHALL BE A MILLTRONICS HYDRORANGER ULTRASONIC MEASURING DEVICE.
2. THE STATION SHALL BE CONTROLLED BY A MODICON QUANTUM PROGRAMMABLE LOGIC CONTROLLER (PLC).
3. THE STATION SHALL BE EQUIPPED WITH A MOTOROLA MOSCAD RADIO TELEMETRY UNIT (RTU). THE TELEMETRY SYSTEM SHALL INCLUDE ALL REQUIRED RADIO ANTENNAS, TOWERS, CABLES AND APPURTENANCES.
4. THE RTU SHALL BE INSTALLED AND FULLY FUNCTIONAL PRIOR TO ACCEPTANCE BY THE CITY OF RIVERSIDE.
5. THE CITY OF RIVERSIDE APPROVED INTEGRATOR SHALL COORDINATE AND PAY FOR THE INTEGRATION OF THIS RTU INTO THE CITY OF RIVERSIDE'S EXISTING SCADA SYSTEM.
6. CONTROL SYSTEM INTEGRATION WITH THE CITY OF RIVERSIDE'S SCADA SYSTEM SHALL BE PERFORMED BY AN INTEGRATOR APPROVED BY THE CITY OF RIVERSIDE.
7. THE INTEGRATOR SHALL PROVIDE A COPY OF THE PROPOSED PLC PROGRAM TO THE CITY OF RIVERSIDE FOR REVIEW PRIOR TO CONSTRUCTION. A FULLY ANNOTATED COPY OF THE PLC PROGRAM SHALL BE PROVIDED, BOTH IN ELECTRONIC FORMAT AND HARD COPY PRINTED FORMAT UPON PROJECT COMPLETION.
