

GENERAL NOTES

- Construction shall be in accordance with the City of Riverside, Department of Public Works, Standard Specifications No. 461 and Standard Drawings.
- It shall be the responsibility of the contractor to clear the right-of-way in accordance with the provisions of the law as it affects each utility including irrigation lines and appurtenances and at no cost to the City.
- Joints in V.C.P. shall be in accordance to A.S.T.M. Specifications C-423 of Type I or III or to A.S.T.M. Specifications C-534-537 (Band Seal) with certain exceptions on file with the City Engineer.
- Pipe shall be bedded per case 1, Standard Drawing No. 452, unless otherwise specified on plan.
- Location of Tees and laterals are to be determined in the field as determined by the owner.
- All stubs and laterals to be constructed in accordance with Standard Drawing No. 562. Stubs shall be plugged and capped.
- Manhole frames and covers to be set to proposed pavement grades.
- Laterals are to be 4" and extended to property line except as shown on plan.
- Prior to construction of sewer, Contractor is to expose existing sewer and contact engineer for verification of elevations.
- Refer to Mobilehome Park Sewer Plans for Utility Pad Details- Location by owners architect.

NOTICE TO CONTRACTOR

The existence and location of any underground utility pipes or structures shown on these plans are obtained by a search of the available records. To the best of our knowledge, there are no existing utilities except as shown on these plans.

The contractor is required to take due precautionary measures to protect the utility lines shown and any other lines not of record or not shown on these plans.
