

GENERAL NOTES

The existence and location of underground pipes or structures shown on these plans was obtained from utility company records. To the best of our knowledge, the information shown is complete. No liability is assumed nor implied by the engineer for omissions, accuracy or completeness of the data shown. The contractor is required to take due precautionary measures to locate and protect all underground pipes, structures and utilities whether shown or not shown on these plans.

Construction shall be in accordance with the City of Riverside Dept. of Public Works Standard Spec. No. 451 and Std. Drawings.

It shall be the responsibility of the Contractor to clear the right of way in accordance with the provisions of the law as it affects each utility including irrigation lines and appurtenances, and at no cost to the City.

~~Items in which city pipe sewers shall conform to ASTM Std. C-225, C-272, or listed company.~~

Pipe shall be bedded per Case 1, Std. Dwg. No. 252, unless otherwise specified on plan.

Location of trees and laterals to be determined in the field by the owner's representative.

All stubs and laterals to be constructed in accordance with Std. Dwg. No. 562. Stubs shall be plugged and capped.

Manhole frames and covers to be set to finished pavement grades.

Laterals are to be 6" unless otherwise shown and extended to property line.

Precast Manholes may be used after obtaining prior approval of the City Engineer.

Joints shall be in conformance to ASTM Specifications C-425-64 Type I or II or to ASTM Specifications C-594-66T ("Bond Seal") with certain exceptions or modifications on file with the City Engineer.

NOTE: Contractor shall uncover exist sewer and engineer shall verify elevation prior to trenching.
