GENERAL NOTES

- If the Subdivider desires to reduce requirements on imported base material, additional soil tests may be taken at the subdivider's expense after streets are prepared to rough grade. Subdivider will contact the Inspection Division, City of Riverside, before making tests. The City of Riverside will make a test of base material in place. Before paving can be installed, results of this test must indicate that the base material in place is satisfactory to the Inspection Department.
- Construction to be in accordance with Standards and Specifications No. 460 of the City of Riverside, Department of Public Works.
- Trim Edge of existing paving where new paving joins existing pavement, to clean straight line. Construct match-up paving as directed in the field to produce a smooth section.

BENCH MARK

Spikes in R.P. 86515 West side of Queen Street 100' South of North end of Street. Elev. 980.97'. F.B. 412/72.
