

**GENERAL NOTES**

1. All construction shall be in accordance with standards and Specifications No. 461 of the City of Riverside Department of Public Works.
2. It shall be the responsibility of the Contractor to clear the Right of Way in accordance with the provisions of law as it affects such utility including irrigation lines and appurtenances and at no extra cost to the City of Riverside.
3. The developer shall arrange for a test of the soil of the subgrade level by a Soils Engineer. Thickness of pavement and thickness and type of aggregate base shall be determined by the Soils Engineer and submitted to the City of Riverside for approval prior to construction.
4. Prime coat, joint binder and seal coat are required.
5. Trim edge of existing paving to a clean straight line. Construct match-up paving and overlap on existing paving as directed in the field to produce a smooth crown surface.
6. Grading will require a permit under Ordinance 3093 for a cut or fill exceeding 100 cubic yards or a fill over one foot in depth.
7. The finished subgrade shall have a compaction of not less than 90% for a depth of 2.5' as determined by test method No. Cal. T. 216 immediately prior to placement of cover.
