Integrating Communications, Assessment and Tactics (ICAT)

3 – Hour Update Course

EXPANDED COURSE OUTLINE

COURSE DESCRIPTION: This is an update course for the original Integrating Communications, Assessment and Tactics Course.

On a daily basis, officers are responding to calls where individuals are behaving erratically, dangerously and are often unarmed or in possession of a weapon other than a firearm. Integrating Communications, Assessment and Tactics (ICAT) is a use-of-force training guide designed to provide tactical options to law enforcement personnel that are required to respond to volatile situations involving subjects in crisis. The training model includes Power Point presentations, videos, and group exercises discussing the key areas of decision-making, crisis recognition and response, de-escalation, tactical communications, operational safety tactics and arrest team procedures. ICAT then integrates these skills and provides opportunities to practice them through video debrief exercises.
