

Fuel Saving Tips

Avoid High Speeds

As your speed increases, your aerodynamic drag increases

Use A/C Sparingly

Air conditioner use results in increased fuel consumption

Keep Tires Properly Inflated

Keep tire air pressure at the recommended level

Do Not Accelerate or Brake Hard

Increase fuel economy by as much as 20%

Keep Windows Closed

Windows open increase drag and result in decreased fuel economy

Service Vehicle Regularly

Proper maintenance avoids poor fuel economy related to dirty air levels.

Use Cruise Control

Maintaining a constant speed over long distances

Avoid Heavy Loads

Remove excess items from your trunk and pack lightly for long trips.

Avoid Long Idles

Restarting the engine uses less fuel than letting it idle

Purchase a Fuel Efficient Vehicle

a small vehicle with a manual transmission will provide you with better fuel economy.
