Media Invited to Voltu Motor Inc. Demonstration Day at 10 a.m. Thursday to Mark Operational Launch at Riverside Global Headquarters

RIVERSIDE, Calif. – [Voltu Motor](#) today (3/16) announced a major milestone in the company’s growth with a Demonstration Day planned at its Riverside headquarters. The event is a direct response to a strong market push and high volume of requests from customers and fleet managers eager to experience the Voltu3 vehicle and its supporting infrastructure firsthand.

The Demonstration Day will take place on **Thursday, March 19, from 10 a.m. to noon** at Voltu Motor’s global headquarters located at **1980 Eastridge Ave, Riverside**. The event is timed with the imminent delivery of the first **20 Voltu3 trucks** that will roll out from the Riverside production line -- the first of 600 vehicles projected for delivery in 2026.

The media is invited to the event, which is not open to the public

“This milestone is a direct reflection of the market’s demand for immediate, performance focused and cost sensitive solutions,” said **George Gebhart, CEO of Voltu Motor**. “This event responds to the push from our customers to get behind the wheel and test the technology. We are excited to show fleet managers from across California that Voltu is ready to meet their operational requirements today.”

Event Highlights

In response to industry demand, the Demonstration Day will feature a technical showcase of Voltu’s integrated ecosystem:

- **Live Vehicle Demonstrations and Testing Operations:** Witness the Voltu3 in active duty cycles to evaluate its performance and handling.
- **Voltu AC Fast Charger Demonstrations:** Experience the proprietary high-speed charging technology designed to maximize fleet uptime.

The event at 1980 Eastridge Ave. features the Voltu3, the first True Heavy Duty All-Electric Pickup Truck. By integrating proprietary technology across both vehicle performance and charging infrastructure, Voltu is now fulfilling a critical market gap where no EV offering exists.
