PREPARING FOR THE FUTURE

2000-2001 FINANCIAL STATEMENTS
Riverside Public Utilities is committed to the highest quality water and electric services at the lowest possible rates to benefit the community.
Board of Public Utilities

The Board of Public Utilities is composed of seven citizens appointed to four-year terms by City Council to govern utility policies and represent the community. Citizens serve on a voluntary basis without compensation. Applications for new members are solicited annually by the City of Riverside. Applicants must be at least 18 years of age and reside within the City of Riverside in order to be eligible to serve on the board.

The Board of Public Utilities meets at 8:15 a.m. on the first and third Fridays of each month in the Art Pick City Council Chambers at City Hall, 3900 Main Street, Riverside. Board meetings are open to the public.
At Riverside Public Utilities, our mission is clear - to provide the highest quality water and electric services at the lowest possible rates to benefit the community.

To accomplish this, more than 400 employees work together to maintain our facilities, assure safe, quality services, and prepare for the future of our Utility.

Throughout the years, our financial plans have evolved with the ever-changing electric market in California. We once prepared ourselves for competition by promoting low rates, reliability, customer services, local control, and ownership. Today, these business attributes are just the core elements of our new, larger business outlook.

This new outlook features diversified energy and financial portfolios - with views of reinvestment, both in our community and financially. It also allows us to find new, innovative ways to conserve water and electricity in our community, which helps to preserve our natural resources and ensures our customers of quality services for many years to come.

In 2000-2001, we sustained our commitments to our customer-owners by maintaining strong financial portfolios. Additionally, we continued to make improvements to our water and electric facilities that both upgrade and maintain our existing water and energy delivery systems, and help increase our service obligations. Our water delivery division diligently maintained our pledge to provide only the highest quality drinking water to our customers, while our energy delivery division worked hard to avoid rolling blackouts and maintain electric services to the City of Riverside in a hostile energy market.

As we look toward the future, we see that many things will change in the electric and water markets within the state. However, Riverside Public Utilities’ mission to provide high quality, low cost services will remain constant - as it has for over 106 years.
TO THE HONORABLE CITY COUNCIL AND BOARD OF PUBLIC UTILITIES
CITY OF RIVERSIDE, CALIFORNIA

We have audited the accompanying balance sheets of the City of Riverside Electric Utility as of June 30, 2001 and 2000, and the related statements of revenues, expenses, and changes in equity and cash flows for the years then ended. These financial statements are the responsibility of the Electric Utility's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

As discussed in Note 1, the accompanying financial statements present only the Electric Utility Enterprise Fund and are not intended to present fairly the financial position of the City of Riverside, California, and the results of its operations and cash flows of its business type activities in conformity with accounting principles generally accepted in the United States of America.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of the City of Riverside Electric Utility as of June 30, 2001 and 2000, and the results of its operations and its cash flows for the years then ended in conformity with accounting principles generally accepted in the United States of America.

As discussed in Note 1 to the financial statements, the Electric Utility adopted Governmental Accounting Standards Board (GASB) Statements No. 33, Accounting and Financial Reporting for Nonexchange Transactions, No. 34, Basic Financial Statements- and Management's Discussion and Analysis- for State and Local Governments, No.37, Basic Financial Statements- and Management's Discussion and Analysis for State and Local Governments: Omnibus and No. 38, Certain Financial Statement Note Disclosures, effective July 1, 1999.

Also described in Note 1 to the financial statements, the Electric Utility changed its policy for capitalization of fixed assets. As a result of this change, equity of the Electric Utility as of July 1, 1999 was decreased by $932,000.

The Management's Discussion and Analysis is not a required part of the financial statements but is supplementary information required by the Governmental Accounting Standards Board. We have applied certain limited procedures, which consist primarily of inquiries of management regarding the methods of measurement and presentation of the supplementary information. However, we did not audit this information and express no opinion on it.

The Electric Statistics as listed in the table of contents is presented for purposes of additional analysis and is not a required part of the financial statements of the Electric Utility. Such information has not been subjected to the auditing procedures applied in the audit of the financial statements, and accordingly, we express no opinion on it.

December 14, 2001
Management's Discussion and Analysis

As management of Riverside Public Utilities (a department of the City of Riverside), we offer the readers of the City of Riverside Electric Utility financial statements this narrative overview and analysis of the financial activities of the Electric Utility for the fiscal year ended June 30, 2001. We encourage readers to consider the information presented here in conjunction with additional information furnished in our fiscal message on page 2 of this report. All amounts, unless otherwise indicated, are expressed in thousands of dollars.

FINANCIAL HIGHLIGHTS

The assets of the Electric Utility exceeded its liabilities at the close of the most recent fiscal year by $150,088 (equity). Of this amount, $94,386 may be used to meet the utility's ongoing obligations to creditors and customers.

The utility's total equity increased by $10,999 from the prior fiscal year, primarily due to positive income from operations ($2,724) and contributed capital from developer fees ($8,275).

At the end of the current fiscal year, unrestricted equity represented over 42 percent of annual operating expenses for 2001.

OVERVIEW OF THE FINANCIAL STATEMENTS

This discussion and analysis are intended to serve as an introduction to the City of Riverside Electric Utility financial statements. The Electric Utility is a department of the City of Riverside, and its activities are recorded in a separate fund. Because the utility is a business-type activity of the City of Riverside, an enterprise fund is used to account for its electric utility operations. These financial statements include only the activities for the City of Riverside Electric Utility and provide comparative information for the last two fiscal years. Information on city-wide financial results is available in the City of Riverside Comprehensive Annual Financial Report.

The City of Riverside Electric Utility's financial statements comprise two components: 1) financial statements and 2) notes to the financial statements. In addition, this report also contains other supplementary information to provide the reader additional information about the Electric Utility, including sales statistics and other relevant data.

Included as part of the financial statements are three separate statements.

The Balance Sheets present information on assets and liabilities, with the difference between the two reported as equity. Over time, increases or decreases in equity may serve as a useful indicator of whether the financial condition of the utility is improving or deteriorating.

The Statements of Revenues, Expenses and Changes in Equity present information showing how the utility's equity changed during the most recent two fiscal years. Results of operations are reported as underlying events occur, regardless of the timing of cash flows. Thus, revenues and expenses are reported in these statements for some items that will only result in cash flows in future fiscal periods, i.e. accounts payable and accounts receivable. This is called accrual basis of accounting and is more fully described in the accompanying Notes to the Financial Statements.

The Statements of Cash Flows present the cash flow changes occurring during the last two fiscal years in highly liquid cash and investments, including certain restricted assets.

The Notes to the Financial Statements provide additional information that is essential to a full understanding of the data provided in the financial statements. The notes to the financial statements can be found on pages 12 to 19 of this report.

Utility Financial Analysis

As noted earlier, equity (also called net assets) may serve over time as a useful indicator of the fund's financial position. In the case of Riverside's Electric Utility, assets exceeded liabilities by $150,088 at the close of the most recent fiscal year.

A portion of the Utility's net assets (25 percent) reflects its investment in capital assets, such as transmission, distribution and generation facilities, less any related debt used to acquire those assets that remains outstanding. The Electric Utility uses these capital assets to provide services to customers; consequently, these assets are not available for future spending. Resources needed to repay the outstanding debt shown on the balance sheet must come from other sources such as operations, since the capital assets themselves cannot be used to liquidate these long-term liabilities.

The unrestricted portion of the Utility's net assets (63 percent) may be used to meet the utility's ongoing obligations to creditors and customers.
The Electric Utility's equity increased by $10,999 during the current fiscal year. About 75 percent of this increase relates to receiving one-time developer fees and other contributed capital due to increased building activity in Riverside. The remaining 25 percent is attributable to increased revenues outstripping increases in ongoing operating expenses, especially Production expenses (power purchases).

Key elements in the increase in equity are as follows:

</table>
Retail sales (residential, commercial, industrial and other sales) continue to be the primary revenue source for the electric utility making up 63 percent of total revenue. Retail sales showed a slight decrease from prior year (0.3 percent) due to conservation measures by customers and cooler than normal weather.

Wholesale sales became a major revenue source this year as prices for power increased substantially and demand in certain months was less than expected, creating excess power available for resell to other electric utilities. These changes caused an increase in Wholesale sales of $59,697 from the prior fiscal year.

Interest income increased by $3,528 because of an overall increase in the size of the investment portfolio, as well as a stronger market.

Capital contributions reflect increased building activity in the area, showing a 79 percent increase over prior year results.

Total expenses show a large increase over the prior fiscal year, with the primary increase coming from increased Production costs. Production costs include the cost of power, which experienced large price increases based on the volatile electric market in California. In addition, unplanned outages at several power plants required purchase of additional replacement power at very high prices.

Transmission expenses declined by 11 percent due to debt refinancing at several transmission projects and declining interest rates on project related variable rate debt.

Distribution expenses increased by $886 due to salary increases negotiated with various bargaining units and general cost of living type increases for other operating expenses.

Contributions to the City’s general fund are based on a formula using operating revenues from the prior fiscal year. This amount also increased by $838 or 5.8 percent.

**Revenues by Sources - Electric Utility**

- Interest Expense (4%)
Management’s Discussion and Analysis

CAPITAL ASSET AND DEBT ADMINISTRATION

The Electric Utility’s investment in capital assets as of June 30, 2001 amounts to $223,563 (net of accumulated depreciation). This includes investments in production (generation), transmission, and distribution related facilities, as well as general items such as office equipment, furniture, etc. This fiscal year showed a 2.7 percent increase in capital assets over the prior year. Major capital asset events during the current fiscal year included:

• Various capital additions at the City’s San Onofre Nuclear Generating Station (SONGS) equal to $633
• Capital additions to connect new customers to the system totaled $6,500
• Capital additions to increase system reliability totaled $3,400
• Capital additions to maintain obligation to serve and improve community relations totaled $1,600

Additional information regarding capital assets can be found in Note 1 on pages 12 to 14 of this report.

Long-term Debt  At the end of the current fiscal year, the City of Riverside’s Electric Utility had long-term debt outstanding of $191,884. This debt is backed by the revenue of the utility ( revenue bonds), with the exception of $22, which is a capital lease for office equipment. No major changes occurred in the utilities long-term debt during this fiscal year. The small decrease is due to regularly scheduled principal payments on the outstanding debt.

</tbody>
</table>

The electric utility maintains an “A+” rating from Standard & Poor’s and Fitch for its revenue bonds.

In August 2001, the electric utility issued $47,215 additional revenue bonds to finance a peaking generation project to be located in the City of Riverside. The project consists of four 10 MW peaking units which will be used to supply power during heavy energy usage or in case of emergency outages of major portions of the electric system.

Additional information on the electric utility’s long-term debt can be found in Note 4 on page 16 of this report.

Economic Factors and Rates

While general inflationary trends in the region compare favorably to national indices, the cost of purchased power included in the Production expense category increased significantly due to a shortage of energy in the western United States, and more specifically California. This crisis has had the impact of forcing the state’s largest investor owned utility (IOU) into bankruptcy, with the other major IOU threatening bankruptcy as well. While Riverside had adequate power supply for the majority of its needs, during certain times it was necessary to purchase power from the electricity market due to unexpected load demands or the outage of a power plant. During these times, Riverside was subjected to extremely high prices for power.

Power purchased in fiscal year 2001 to cover expected loads during fiscal year 2002 and 2003 (summer) were obtained at a fairly high price in comparison to prices in recent history. While price caps put in place by the Federal Energy Regulatory Commission have reduced the high prices and related volatility experienced in fiscal 2001, it remains to be seen what impact this crisis will have in the long-term pricing of energy. Fiscal year 2002 budget for power supply was increased by $42.0 million to provide additional funding for these additional costs.

Requests for Information

This financial report is designed to provide a general overview of the City of Riverside Electric Utility’s finances. Questions concerning any information provided in this report or requests for additional financial information should be addressed to the Chief Financial Officer, Riverside Public Utilities, 3900 Main Street, 4th floor, Riverside, CA 92522.

- Cash paid to suppliers and employees (209,956) (166,070)
- Other non-operating revenue 1,363 2,127

Net cash provided by operating activities 40,596 16,894

### CASH FLOWS FROM NON-CAPITAL FINANCING ACTIVITIES:
- Transfers out - contributions to the City's general fund (15,243) (14,405)

### CASH FLOWS FROM CAPITAL AND RELATED FINANCING ACTIVITIES:
- Purchase of utility plant (14,101) (10,024)
- Purchase of nuclear fuel (1,545) (314)
- Proceeds from the sale of utility plant 221 126
- Principal paid on long-term obligations (6,941) (6,603)
- Interest paid on long-term obligations (10,554) (10,850)
- Contributed capital 4,269 2,016

Net cash used by capital and related financing activities (28,651) (25,649)

### CASH FLOWS FROM INVESTING ACTIVITIES:
- Purchase of investment securities (3,204) (3,088)
- Income from investments 8,456 5,159

Net cash provided by investing activities 5,252 2,071

### RECONCILIATION OF OPERATING INCOME TO NET CASH PROVIDED BY OPERATING ACTIVITIES:
- Operating income $19,062 $25,268

Adjustments to reconcile operating income to net cash provided by operating activities:
- Other non-operating revenue 1,363 2,127
- Depreciation expense 12,306 11,886
- Amortization (burn) of nuclear fuel 970 1,310
- Provision for uncollectible accounts receivable 10,941 29
- Increase in accounts receivable (9,211) (7,265)
- Increase in prepaid expenses (272) (30)
- Increase in nuclear materials inventory (35) (15)
- Increase in unamortized purchased power 0 (25,056)
- Increase in accounts payable 1,664 2,233
- Increase in accrued liabilities 226 54
- Increase in public benefit program deferred revenue 716 3,252
- Increase (decrease) in customer deposits (361) 96
- Increase in decommissioning liability 3,227 3,063

Net cash provided by operating activities $40,596 $16,894

### SCHEDULE OF NON-CASH INVESTING, CAPITAL AND FINANCING ACTIVITIES:
- Contributions in aid of construction $4,006 $2,596

---

1 Cash and cash equivalents also include cash and cash equivalents in restricted assets.
NOTE 1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The Electric Utility exists under, and by virtue of, the City Charter enacted in 1883. The Electric Utility is responsible for the generation, transmission and distribution of electric power for sale in the City.

■ Basis of Accounting  The accounting records of the Electric Utility are in accordance with accounting principles generally accepted in the United States of America as applicable to governments and substantially in conformity with the Uniform System of Accounts prescribed by the Federal Energy Regulatory Commission. The Electric Utility is not subject to the regulations of the Federal Energy Regulatory Commission. The Electric Utility is not required to and does not elect to implement the pronouncements of the Financial Accounting Standards Board issued after November 1989.

■ Accounting Changes and Restatements  On July 1, 1999, the Electric Utility adopted four new accounting statements issued by the Governmental Accounting Standards Board (GASB):

- Statement No. 34, Basic Financial Statements- and Management’s Discussion and Analysis- for State and Local Governments;
- Statement No. 37, Basic Financial Statements- and Management’s Discussion and Analysis- for State and Local Governments: Omnibus;
- Statement No. 38, Certain Financial Statement Disclosures.

Statement No. 33 prescribes standards for recording nonexchange transactions on the modified accrual and accrual bases of accounting. This standard required capital contributions from external parties to be recorded separately on the Statement of Revenues, Expenses and Changes in Equity rather than as a direct addition to equity. There was no effect on equity as a result of implementation of this standard as of July 1, 1999.

Statement No. 34 (as amended by Statement No. 37) resulted in minor changes in the financial reporting model used by the Electric Utility. Statement No. 34 also requires, as required supplementary information, Management’s Discussion and Analysis, which includes an analytical overview of the Electric Utility’s financial activities.

Statement No. 38 requires certain disclosures to be made in the notes to the financial statements concurrent with the implementation of Statement No. 34. While this Statement does not affect amounts reported in the financial statements of the Utility, certain note disclosures have been added and or amended.

On July 1, 1999, the Electric Utility also decided to change its capitalization threshold from $1,000 to $5,000. The Utility wrote-off all capital assets under $5,000 and as a result beginning equity was decreased by $932,000.

■ Revenue Recognition  The Electric Utility uses the accrual basis of accounting. Revenues are recognized when earned and expenses are recognized when incurred. Electric Utility customers are billed monthly. Unbilled electric service charges are recorded at year-end and are included in accounts receivable. Unbilled accounts receivable totaled $8,535,000 at June 30, 2001, and $8,794,000 at June 30, 2000.

An allowance for doubtful accounts is maintained for utility and miscellaneous accounts receivable. The balance in this account is adjusted at fiscal year-end to approximate the amount anticipated to be uncollectible. Significant increases in allowance for fiscal year 2001 are a result of nonpayment from Southern California Edison for ancillary services (see Note 10).

■ Utility Plant and Depreciation  Utility plant assets are valued at historical cost or estimated historical cost, if actual historical cost is not available. Costs include labor; materials; allocated indirect charges such as engineering, supervision, construction and transportation equipment; retirement plan contributions and other fringe benefits; and certain administrative and general expenses. Contributed plant assets are valued at estimated fair market value on the date contributed. The cost of relatively minor replacements is included in maintenance expense.

Depreciation is provided over the estimated useful lives of the related assets using the straight-line method. The estimated useful lives are as follows:

- Production plant .......................................................... 30 years
- Transmission and distribution plant ................. 20-50 years
- General plant and equipment ............................................. 3-15 years

■ Nuclear Fuel  The Electric Utility amortizes the cost of nuclear fuel to expense using the “as burned” method. In accordance with the Nuclear Waste Disposal Act of 1982, the Electric Utility is charged one mill per kilowatt-hour of energy generated by the City’s share of San Onofre Nuclear Generating Station’s Units 2 and 3 to provide for estimated future storage and disposal of spent fuel. The Electric Utility pays this fee to its operating agent, Southern California Edison Co (SCE), on a quarterly basis (see Note 7).

■ Restricted Assets  Proceeds of revenue bonds yet to be used for capital projects, as well as certain resources set aside for debt service, are classified as restricted assets on the balance sheet because their use is limited by applicable bond covenants. Funds set aside for the nuclear decommissioning reserve are also classified as restricted assets because their use is legally restricted to a specific purpose.
NOTE 1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

In January 1998, the Electric Utility began collecting a surcharge for public benefit programs on customer utility bills. This surcharge is mandated by state legislation included in Assembly Bill 1890 and is restricted to various socially beneficial programs and services. The programs and services include cost effective demand-side management services to promote energy efficiency and conservation and related education and information; ongoing support and new investments in renewable resource technologies; energy research and development; and programs and services for low-income electric customers. The activity associated with the surcharge for public benefit programs is reflected in the accompanying financial statements as a restricted asset and deferred revenue.

- **Cash and Investments**  The City follows the practice of pooling cash and investments of all funds except for funds required to be held by outside fiscal agents under the provisions of bond indentures. Cash accounts for all City funds are pooled for investment purposes to enhance safety and liquidity while maximizing interest earnings. Interest income earned on pooled cash is allocated monthly to the various funds of the City based on the month-end cash balances. Cash and investments held by fiscal agents are credited directly to the related accounts.

The City values its cash and investments in accordance with the provisions of Governmental Accounting Standards Board (GASB) Statement No. 31: Accounting and Financial Reporting for Certain Investments and External Investment Pools (GASB 31), which requires governmental entities, including governmental external investment pools, to report certain investments at fair value in the balance sheet and recognize the corresponding change in the fair value of investments in the year in which the change occurred. Fair value is determined using quoted market prices.

All highly liquid investments (including restricted assets) with a maturity of three months or less when purchased are considered to be cash equivalents. Cash and investments held on behalf of the Electric Utility by the City Treasurer are considered highly liquid and are classified as cash equivalents for the purpose of presentation in the related accounts.

- **Inventories**  The City maintains a separate Central Stores inventory. The Electric Utility expenses items as they are drawn out of Central Stores. As such, the Electric Utility does not include inventories in its financial statements.

- **Bond Discounts and Issuance Costs**  Bond discounts and issuance costs are deferred and amortized over the term of the bonds using the effective interest method. Bond discounts are presented as a reduction of the face amount of bonds payable, whereas issuance costs are recorded as other assets.

- **Nuclear Decommissioning Reserve**  Federal regulations require the Electric Utility to provide for the future decommissioning of its ownership share of the nuclear units at San Onofre. The Electric Utility has established a trust account to accumulate resources for the decommissioning of the nuclear power plant and restoration of the beachfront at San Onofre. Each year the Electric Utility recognizes an expense in the amount of the contribution to the trust account. The funding will occur over the useful life of the generating plant. Amounts held in the trust account are classified as restricted assets in the accompanying balance sheet. To date, the Electric Utility has set aside $31,527,000 in cash and investments with the trustee as Riverside’s estimated share of the decommissioning cost of San Onofre. Based on a cost estimate completed by SCE and approved by the California Public Utilities Commission, the Electric Utility plans to set aside approximately $1.6 million per year to fund this obligation. The plant site easement at San Onofre terminates May 2050. The plant must be decommissioned and the site restored by the time the easement terminates.

- **Competitive Transition Account**  A Competitive Transition Account (CTA) was established in June 1998 after approval by the Board of Public Utilities and the City Council. This new account was funded by a transfer of $23.5 million from a rate stabilization account and $10 million from an operating cash reserve account. The CTA is an internally restricted asset and the Board and City Council will approve usage of funds on an annual or as-needed basis for purposes of handling competitive financial issues. This account was established for a short-term period (five years) during the anticipated phase-in of retail competition in the electric utility industry. Possible fund uses include early pay down of generation-related debt or long-term contracts, rate stabilization or other competitive purposes. The balance in the CTA at June 30, 2001 and 2000 was $20.7 and $19.5 million, respectively, and is reflected as a current asset in the accompanying financial statements as part of cash and cash equivalents.

- **Customer Deposits**  The City holds customer deposits as security for the payment of utility bills. The Electric Utility’s portion of these deposits as of June 30, 2001 and 2000, was $2,103,000 and $2,464,000, respectively.

- **Compensated Absences**  The accompanying financial statements include accruals for salaries, fringe benefits and compensated absences due employees at June 30, 2001 and 2000. The Electric Utility treats compensated absences due employees as a current liability. The amount accrued for compensated absences was $4,233,000 at June 30, 2001, and $4,046,000 at June 30, 2000, and is included in current liabilities in the accompanying balance sheets.
CITY OF RIVERSIDE ELECTRIC UTILITY

Notes to the Financial Statements

NOTE 1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Employees receive 10 to 25 vacation days per year based upon length of service. A maximum of two years vacation may be accumulated and unused vacation is paid in cash upon separation.

Employees primarily receive one day of sick leave for each month of employment with unlimited accumulation. Upon retirement or death only, a percentage of unused sick leave is paid to certain employees or their estates in a lump sum based on longevity.

Self-Insurance Program The Electric Utility participates in a self-insurance program for workers’ compensation and general liability coverage that is administered by the City. The Electric Utility pays an amount to the City representing an estimate of amounts to be paid for reported claims incurred and incurred but unreported claims based upon past experience, modified for current trends and information.

Although the ultimate amount of losses incurred through June 30, 2001, is dependent upon future developments, management believes that amounts paid to the City are sufficient to cover such losses. Any losses above the City’s reserves would be covered through increased rates charged to the Electric Utility in future years.

Employee Retirement Plan The City contributes to the California Public Employees Retirement System (PERS), an agent multiple-employer public employee retirement system that acts as a common investment and administrative agency for participating public entities within the state of California.

All permanent full-time and selected part-time employees are eligible for participation in PERS. Benefits vest after five years of service and are determined by a formula that considers the employee’s age, years of service and salary. Employees may retire at age 55 and receive 2 percent of their highest average annual salary for each year of service completed. PERS also provides death and disability benefits. These benefit provisions and all other requirements are established by state statute and City ordinance.

Employee contributions are 7 percent. The Electric Utility is required to contribute the remaining amounts necessary to fund the benefits for its employees using the actuarial basis recommended by the PERS actuaries and actuarial consultants and adopted by the PERS Board of Administration. The Electric Utility pays both the employee and employer contributions.

Citywide information concerning elements of the unfunded actuarial accrued liabilities, contributions to PERS for the year ended June 30, 2001, and recent trend information may be found in the notes of the City’s “Comprehensive Annual Financial Report” for the fiscal year ended June 30, 2001.

Contributions to the City’s General Fund Pursuant to the City Charter, the Electric Utility may transfer up to 11.5 percent of its prior year’s gross operating revenues to the City’s general fund. In fiscal years 2000-01 and 1999-00, the Electric Utility transferred 9.0 percent of gross operating revenues, or $15,243,000 and $14,405,000, respectively.

Budgets and Budgetary Accounting The Electric Utility presents, and the City Council adopts, an annual budget. The proposed budget includes estimated expenses and forecasted revenues. The City Council adopts the Electric Utility’s budget at its last meeting in June via an adopting resolution.

Reclassifications Certain reclassifications have been made to the prior year’s financial statements to conform with the current year’s presentation.

NOTE 2. CASH AND INVESTMENTS

Cash and investments at June 30, 2001 and 2000, consist of the following (in thousands):

Notes to the Financial Statements

NOTE 2. CASH AND INVESTMENTS (CONTINUED)

- **Authorized Investments** Under provisions of the City’s investment policy and in accordance with California Government Code Section 53601, the City Treasurer may invest or deposit in the following types of investments:
  - Securities of the U.S. government, or its agencies
  - Local agency investment fund (state pool) deposits
  - Small Business Administration loans
  - Passbook savings account demand deposits
  - Negotiable certificates of deposits
  - Repurchase agreements
  - Banker’s acceptances
  - Mutual funds
  - Commercial paper of “prime” quality
  - Medium-term corporate notes

- **Credit Risk, Carrying Amount and Market Value of Deposits and Investments** Cash and non-negotiable certificates of deposit are classified in three categories of custodial credit risk as follows: Category 1—insured or registered, or securities held by the City or its agent in the City’s name; Category 2 — collateralized with securities held by the pledging financial institution’s trust department or agent in the City’s name; Category 3 — uninsured and unregistered, with securities held by the counterparty’s trust department or agent but not in the City’s name. Investments in pools managed by other governments or in mutual funds are not required to be categorized.

The Electric Utility’s share of the City’s investments at June 30, 2001, represents approximately 28 percent or $119,308,000 of the City’s total cash and investments of $428,998,000. Information concerning credit risk and fair value of the City’s deposits and investments may be found in the notes of the City’s “Comprehensive Annual Financial Report” for the fiscal year ended June 30, 2001. Cash and investments at fiscal agent are insured or registered, or held in the name of the Electric Utility or its agent (category 1), or are not subject to risk categorization.

NOTE 3. UTILITY PLANT

The following is a summary of changes in utility plant during the fiscal year ended June 30, 2001 and 2000 (in thousands):

**Debt Service Coverage Ratio** The Electric Utility’s bond indentures require the Electric Utility to maintain a minimum debt service coverage ratio, as defined by the bond covenants, of 1.25. The Electric Utility’s debt service coverage ratio was 2.69 at June 30, 2001, and 2.76 at June 30, 2000.
NOTE 5. RESTRICTED EQUITY

Pursuant to applicable bond indentures, a reserve for debt service has been established by restricting assets and reserving a portion of equity. Bond indentures for Riverside’s electric revenue and refunding bonds require reserves that equate to the maximum annual debt service required in future years plus three months interest and nine months principal due in the next fiscal year. The reserve for Riverside’s portion of FARECal revenue bonds is equal to 10 percent of the program agreement amounts. Additional reserves for the 1998 and 1991 revenue bonds are not required due to the purchase of surety bonds to cover the required reserve requirements.

NOTE 6. JOINTLY-GOVERNED ORGANIZATIONS

Southern California Public Power Authority

On November 1, 1980, the City of Riverside joined with the Imperial Irrigation District and the cities of Los Angeles, Anaheim, Vernon, Azusa, Banning, Colton, Burbank, Glendale and Pasadena to create the Southern California Public Power Authority (SCPPA) by a Joint Powers Agreement under the laws of the state of California. The primary purpose of SCPPA is to plan, finance, develop, acquire, construct, operate and maintain projects for the generation and transmission of electric energy for sale to its participants. SCPPA is governed by a Board of Directors, which consists of one representative for each of the members. During the 2000-01 and 1999-00 fiscal years, the Electric Utility paid approximately $18,600,000 and $21,280,000, respectively, to SCPPA under various take-or-pay contracts that are described in greater detail in Note 8. These payments are reflected as a component of production in the financial statements.

Power Agency of California

On July 1, 1990, the City of Riverside joined with the cities of Azusa, Banning and Colton to create the Power Agency of California (PAC) by a Joint Powers Agreement under the laws of the state of California. The city of Anaheim joined PAC on July 1, 1996. The primary purpose of PAC is to take advantage of synergies and economies of scale as a result of the five cities acting in concert. PAC has the ability to plan, finance, develop, acquire, construct, operate and maintain projects for the generation and transmission of electric energy for sale to its participants. PAC is governed by a Board of Directors, which consists of one representative for each of the members. The term of the Joint Powers Agreement is 50 years. On June 30, 2001 the Agency is in an inactive status, and can be reactivated with authorization from the Agency Board.

Financing Authority for Resource Efficiency of California

On July 1, 1993, the City of Riverside joined with the cities of Anaheim, Colton, Compton, Healdsburg, Los Angeles, Palo Alto, Pasadena, Redding, Santa Cruz; the North Marin Water District; the Northern California Power Agency; the Sacramento Municipal Utility District; and Turlock Irrigation District to create the Financing Authority for Resource Efficiency of California (FARECal). The primary purpose of FARECal is to issue bonds and use the proceeds to promote, advance, encourage and participate in conservation, reclamation and other programs that are designed to utilize energy or water resources more efficiently. FARECal is administered by a Board of Directors comprised of one representative from each charter member (the cities of Anaheim, Los Angeles, Palo Alto and Riverside and the North Marin Water District) and three voting-based directors, which currently are representatives from Trinity Public Utilities District, Colton and Pasadena. The Electric Utility’s portion of the FARECal debt and utility plant assets is recorded in the accompanying financial statements.

NOTE 7. JOINTLY-OWNED UTILITY PROJECT

Pursuant to a settlement agreement with SCE, dated August 4, 1972, the City was granted the right to acquire a 1.79 percent ownership interest in San Onofre Nuclear Generating Station (SONGS), Units 2 and 3, equating to 19.2 MW and 19.3 MW respectively, of the available capacity. In the settlement agreement, SCE agreed to provide the necessary transmission service to deliver the output of SONGS to Riverside. SCE and the City entered into the SONGS Participation Agreement that sets forth the terms and conditions under which the City, through the Electric Utility, participates in the ownership and output of SONGS. Other participants in this project include SCE, 75.05 percent; San Diego Gas & Electric Company, 20.00 percent; and the city of Anaheim, 3.16 percent. Maintenance and operation of SONGS remain the responsibility of SCE, as operating agent for the City.

There are no separate financial statements for the jointly-owned utility plant since each participant’s interests in the utility plant and operating expenses are included in their respective financial statements. The Electric Utility’s 1.79 percent share of the capitalized construction costs for SONGS totaled $127,500,000 and $126,850,000 for fiscal years ended June 30, 2001 and 2000, respectively. The accumulated depreciation amounted to $77,343,000 and $72,444,000 for the fiscal years ended June 30, 2001 and 2000, respectively. The Electric Utility made provisions during fiscal years 2000-01 and 1999-00 for nuclear fuel burn of $970,000 and $1,310,000, respectively, and for future decommissioning costs of $1,581,000 for 2000-01 and 1999-00 fiscal years (see Note 1). The Electric Utility’s portion of current and long-term debt associated with SONGS is included in the accompanying financial statements.

As a participant in SONGS, the Electric Utility could be subject to assessment of retrospective insurance premiums in the event of a nuclear incident at San Onofre or any other licensed reactor in the United States. Potential defaults by SCE of its SONGS 2 and 3 obligations are not expected to significantly increase Riverside's liabilities for SONGS operations, arising out of non-nuclear incidents.
**NOTE 8. COMMITMENTS**

**Take-or-Pay Contracts** The Electric Utility has entered into a power purchase contract with Intermountain Power Agency (IPA) for the delivery of electric power. The Electric Utility's share of IPA power is equal to 7.6 percent, or approximately 126.4 MW, of the generation output of IPA's 1,660 megawatt coal-fueled generating station located in central Utah.

The contract constitutes an obligation of the Electric Utility to make payments solely from operating revenues. The power purchase contract requires the Electric Utility to pay certain minimum charges that are based on debt service requirements. Such payments are considered a cost of production.

The Electric Utility is a member of the Southern California Public Power Authority (SCPPA), a joint powers agency (see Note 6). SCPPA provides for the financing and construction of electric generating and transmission projects for participation by some or all of its members. To the extent the Electric Utility participates in projects developed by SCPPA, the Electric Utility will be obligated for its proportionate share of the project cost.

The projects and the Electric Utility’s proportionate share of SCPPA’s obligations are as follows:

<table>
<thead>
<tr>
<th>PROJECT</th>
<th>PERCENT SHARE</th>
<th>ENTITLEMENT</th>
</tr>
</thead>
<tbody>
<tr>
<td>Palo Verde Nuclear Generating Station</td>
<td>5.4 percent</td>
<td>11.7 MW</td>
</tr>
<tr>
<td>Southern Transmission System</td>
<td>10.2 percent</td>
<td>195 MW</td>
</tr>
<tr>
<td>Hoover Dam Uprating</td>
<td>31.9 percent</td>
<td>30 MW</td>
</tr>
<tr>
<td>Mead-Phoenix Transmission</td>
<td>4.0 percent</td>
<td>12 MW</td>
</tr>
<tr>
<td>Mead-Adelanto Transmission</td>
<td>13.5 percent</td>
<td>110 MW</td>
</tr>
</tbody>
</table>

As part of the take-or-pay commitments with IPA and SCPPA, the Electric Utility has agreed to pay its share of current and long-term obligations. Management intends to pay these obligations from operating revenues received during the year that payment is due.

Take-or-pay commitments expire upon final maturity of outstanding bonds for each project. Final maturities are as follows:

<table>
<thead>
<tr>
<th>PROJECT</th>
<th>EXPIRATION DATE</th>
</tr>
</thead>
<tbody>
<tr>
<td>Intermountain Power Project</td>
<td>2023</td>
</tr>
<tr>
<td>Palo Verde Nuclear Generating Station</td>

NOTE 8. COMMITMENTS (CONTINUED)

Power Purchase Agreements  The Electric Utility has executed five firm power purchase agreements. The agreements are with Deseret Generation and Transmission Cooperative (Deseret) of Murray, Utah; California Department of Water Resources (CDWR); and Bonneville Power Administration (BPA). The minimum annual obligations under each of these contracts are shown in the table below.

*Estimated

The agreement with Deseret is for five megawatts of capacity and associated energy from January 1, 1992, through December 31, 1994, then increasing to 52 megawatts of capacity and associated energy through December 31, 2009. A notice of termination of the power purchase agreement was provided to Deseret effective March 31, 1998, resulting in litigation which was settled on July 31, 1999. Under the terms of the settlement agreement, the notice of termination was rescinded and the power purchase agreement was amended to reflect substantial price reductions after fiscal year 2001 through the term of the agreement in 2009. In exchange, Riverside Public Utilities paid Deseret $25 million from Electric fund reserves, which is reflected on the Balance Sheet as Unamortized purchased power. On July 1, 2002, the Electric utility will begin to realize the benefits related to the price reductions, and will amortize the $25 million over the remaining term of the agreement using the straight-line method.

There are two separate agreements with CDWR. CDWR III is for the purchase of 23 megawatts of capacity from May through October of each year beginning June 1, 1996, for 15 years. CDWR IV is for the purchase of 30 megawatts of capacity from May through October beginning June 1, 1996, for 15 years.

The first agreement with BPA is for the purchase of firm capacity (23 megawatts in the summer months and 16 megawatts in the winter months) beginning February 1, 1991, for a period of 20 years. The 1996 BPA agreement is for the purchase of capacity (50 megawatts during the summer months and 13 megawatts during the winter months) beginning April 30, 1996, for 20 years. Effective May 1, 1998, these summer and winter capacity amounts increased to 60 megawatts and 15 megawatts, respectively, for the remainder of the 1996 agreement.

NOTE 9. LITIGATION

The Electric Utility is a defendant in various lawsuits arising in the normal course of business. Present lawsuits and other claims against the Electric Utility are incidental to the ordinary course of operations of the Electric Utility and are largely covered by the City’s self-insurance program. In the opinion of management and the City Attorney, such claims and litigation will not have a materially adverse effect upon the financial position or results of operations of the Electric Utility.

NOTE 10. SUBSEQUENT EVENTS

On August 2, 2001, the City issued $47,215,000 of electric revenue bonds due in annual installments from $2,855,000 to $4,750,000 through October 1, 2016, interest from 2.9 percent to 5.25 percent.

On November 20, 2001, the City filed a lawsuit in Los Angeles County Superior Court against Southern California Edison (SCE). The suit alleges that SCE has failed to make monthly payments to the City since December 2000 for ancillary services. The complaint seeks damages of approximately $8.5 million, including interest. At June 30, 2001, amounts owed the City by SCE were fully reserved with an allowance for potentially uncollectible receivables.

Independent Auditors' Report

TO THE HONORABLE CITY COUNCIL AND BOARD OF PUBLIC UTILITIES
CITY OF RIVERSIDE, CALIFORNIA

We have audited the accompanying balance sheets of the City of Riverside Water Utility as of June 30, 2001 and 2000, and
the related statements of revenues, expenses, changes in equity and cash flows for the years then ended. These financial
statements are the responsibility of the Water Utility's management. Our responsibility is to express an opinion on these financial
statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those
standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements
are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and
disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates
made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a
reasonable basis for our opinion.

As discussed in Note 1, the accompanying financial statements present only the Water Utility Enterprise Fund and are not intended
to present fairly the financial position of the City of Riverside, California, and the results of its operations and cash flows of its
business type activities in conformity with accounting principles generally accepted in the United States of America.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of the
City of Riverside Water Utility as of June 30, 2001 and 2000, and the results of its operations and its cash flows for the years
then ended in conformity with accounting principles generally accepted in the United States of America.

As discussed in Note 1 to the financial statements, the Water Utility adopted Governmental Accounting Standards Board (GASB) Statements No. 33, Accounting and Financial Reporting for Nonexchange Transactions, No. 34, Basic Financial Statements and Management's Discussion and Analysis for State and Local Governments, No. 37, Basic Financial Statements and Management's Discussion and Analysis for State and Local Governments: Omnibus and No. 38, Certain Financial Statement Note Disclosures, effective July 1, 1999.

Also described in Note 1 to the financial statements, the Water Utility changed its policy for capitalization of fixed assets. As
a result of this change, equity of the Water Utility as of July 1, 1999 was decreased by $276,000.

The Management's Discussion and Analysis is not a required part of the financial statements but is supplementary information
required by the Governmental Accounting Standards Board. We have applied certain limited procedures, which consist
primarily of inquiries of management regarding the methods of measurement and presentation of the supplementary
information. However, we did not audit this information and express no opinion on it.

The Water Statistics as listed in the table of contents is presented for purposes of additional analysis and is not a required part
of the financial statements of the Water Utility. Such information has not been subjected to the auditing procedures applied
in the audit of the financial statements, and accordingly, we express no opinion on it.

December 14, 2001
Management’s Discussion and Analysis

As management of Riverside Public Utilities (a department of the City of Riverside), we offer the readers of the City of Riverside Water Utility financial statements this narrative overview and analysis of the financial activities of the Water Utility for the fiscal year ended June 30, 2001. We encourage readers to consider the information presented here in conjunction with additional information furnished in our fiscal message on page 2 of this report. All amounts, unless otherwise indicated, are expressed in thousands of dollars.

FINANCIAL HIGHLIGHTS

The assets of the Water Utility exceeded its liabilities at the close of the most recent fiscal year by $158,088 (equity). Of this amount, $27,541 may be used to meet the utility’s ongoing obligations to creditors and customers.

The utility’s total equity increased by $13,720 from the prior fiscal year, primarily due to a large litigation settlement ($2,982) and contributed capital from developer fees ($11,109), offset by a slight loss ($371) from ongoing operations.

At the end of the current fiscal year, unrestricted equity represented over 116 percent of annual operating expenses for 2001.

OVERVIEW OF THE FINANCIAL STATEMENTS

This discussion and analysis are intended to serve as an introduction to the City of Riverside Water Utility basic financial statements. The Water Utility is a department of the City of Riverside, and its activities are recorded in a separate fund. Because the utility is a business-type activity of the City of Riverside, an enterprise fund is used to account for its electric utility operations. These financial statements include only the activities for the City of Riverside Water Utility and provide comparative information for the last two fiscal years. Information on city-wide financial results is available in the City of Riverside Comprehensive Annual Financial Report.

The City of Riverside Water Utility’s financial statements comprise two components: 1) financial statements and 2) notes to the financial statements. In addition, this report also contains other supplementary information to provide the reader additional information about the Water Utility, including sales statistics and other relevant data.

Included as part of the financial statements are three separate statements.

The Balance Sheets present information on assets and liabilities, with the difference between the two reported as equity. Over time, increases or decreases in equity may serve as a useful indicator of whether the financial condition of the utility is improving or deteriorating.

The Statements of Revenues, Expenses, and Changes in Equity present information showing how the utility’s equity changed during the most recent two fiscal years. Results of operations are reported as underlying events occur, regardless of the timing of cash flows. Thus, revenues and expenses are reported in these statements for some items that will only result in cash flows in future fiscal periods, i.e. accounts payable and accounts receivable. This is called accrual basis of accounting and is more fully described in the accompanying Notes to the Financial Statements.

The Statements of Cash Flows present the cash flow changes occurring during the last two fiscal years in highly liquid cash and investments, including certain restricted assets.

The Notes to the Financial Statements provide additional information that is essential to a full understanding of the data provided in the fund financial statements. The notes to the financial statements can be found on pages 32 to 36 of this report.

Utility Financial Analysis

As noted earlier, equity (also called net assets) may serve over time as a useful indicator of the fund’s financial position. In the case of Riverside’s Water Utility, assets exceeded liabilities by $158,088 at the close of the most recent fiscal year.

The largest portion of the Utility’s net assets (78 percent) reflects its investment in capital assets, such as transmission, distribution and production facilities, less any related debt used to acquire those assets that remains outstanding. The Water Utility uses these capital assets to provide services to customers; consequently, these assets are not available for future spending. Resources needed to repay the outstanding debt shown on the balance sheet must come from other sources such as operations, since the capital assets themselves cannot be used to liquidate these long-term liabilities.
Management’s Discussion and Analysis

The unrestricted portion of the Utility's net assets (17 percent) may be used to meet the utility's ongoing obligations to creditors and customers.

An additional portion of the Water Utility's equity (4 percent) represents resources that are subject to external restrictions on how they may be used. These are reserved for items such as debt repayment and other legally restricted assets.

The Water Utility's equity increased by $13,720 during the current fiscal year. About 81 percent of this increase relates to receiving one-time developer fees and other contributed capital due to increased building activity in Riverside. In addition, settlement of several different lawsuits has provided monies to pay for water treatment projects amounting to $2,982 in the 2001 fiscal year.

Key elements of the increase in equity are as follows:

Management’s Discussion and Analysis

Retail sales (residential, commercial and other sales) continue to be the primary revenue source for the water utility making up 56 percent of total revenue. Retail sales showed a slight decrease from prior year (4.7 percent) due to cooler than normal weather.

Interest income increased by $921 because of an overall increase in the size of the investment portfolio, as well as a stronger market.

Capital contributions reflect increased building activity in the area and a large legal settlement from various lawsuits, showing a combined increase of 68 percent over prior year results.

Total expenses show a 7 percent increase over the prior fiscal year, with the primary increase coming from increased operation and maintenance costs. Included in the operation and maintenance category are increases due to negotiated salary increases with various unions and general cost of living type increases for other operating expenses.

Contributions to the City's general fund are based on a formula using 11.5 percent of operating revenues from the prior fiscal year. This amount also increased by $80 or 2.7 percent.

Revenues by Sources - Water Utility

- Retail Sales (56%)
- Contributions in Aid of Construction (25%)
- Legal Settlements (7%)
- Investment Income (6%)
- Other (4%)
- Wholesales Sales (2%)

Expenses - Water Utility

- Operations (37%)
- Depreciation (17%)
- Interest Expense (12%)
- Purchased Energy (11%)
- Maintenance (10%)
- Contributions to the City’s General Fund (10%)
- Purchased Water (3%)
Management's Discussion and Analysis

CITY OF RIVERSIDE WATER UTILITY

CAPITAL ASSET AND DEBT ADMINISTRATION

The Water Utility's investment in capital assets as of June 30, 2001 amounts to $181,771 (net of accumulated depreciation). This includes investments in production, transmission, and distribution related facilities, as well as general items such as office equipment, furniture, etc. This fiscal year showed a 7.1 percent increase in capital assets over the prior year. Major capital asset events during the current fiscal year included:

- Capital additions to connect new customers to the system totaled $1,100
- Capital additions to maintain and improve water quality totaled $6,600
- Capital additions for water main replacement totaled $4,000
- Capital additions to update service standards totaled $4,000

Additional information regarding capital assets can be found in Note 1 on pages 32 and 33 of this report.

Long-term Debt At the end of the current fiscal year, the City of Riverside’s Water Utility had long-term debt outstanding of $55,048. This debt is backed by the revenue of the utility (revenue bonds), with the exception of $22, which is a capital lease for office equipment. No major changes occurred in the utilities long-term debt during this fiscal year. The small decrease is due to regularly scheduled principal payments on the outstanding debt.

</tr>
</tbody>
</table>

The water utility maintains an “AA” rating from Standard & Poor’s and Fitch for its revenue bonds.

In August 2001, the water utility issued $20,000 additional revenue bonds to finance additional capital projects for the water system.

Additional information on the water utility’s long-term debt can be found in Note 4 on page 35 of this report.

Economic Factors and Rates

While general inflationary trends in the region compare favorably to national indices, an inflationary rate increase has been approved for fiscal 2002 and 2003 to provide for increased costs in all functional areas, such as salaries and expenses impacted by general inflation.

Requests for Information

This financial report is designed to provide a general overview of the City of Riverside Water Utility’s finances. Questions concerning any information provided in this report or requests for additional financial information should be addressed to the Chief Financial Officer, Riverside Public Utilities, 3900 Main Street, 4th floor, Riverside, CA 92522.

See accompanying notes to the financial statements.
NOTE 1. SUMMARY OF SIGNIFICANT
ACCOUNTING POLICIES

The Water Utility exists under, and by virtue of, the City
Charter enacted in 1883. The Water Utility is responsible for
the production, transmission and distribution of water for sale
in the City.

- **Basis of Accounting** The accounting records of the
Water Utility are in accordance with accounting principles
generally accepted in the United States of America as applicable
to governments and substantially in conformity with the
Uniform System of Accounts prescribed by the California
Public Utilities Commission. The Water Utility is not subject
to the regulations of the California Public Utilities
Commission. The Water Utility is not required to and does not
 elect to implement the pronouncements of the Financial
Accounting Standards Board issued after November, 1989.

- **Accounting Changes and Restatements** On July 1, 1999, the Water Utility adopted four new
accounting statements issued by the Governmental
Accounting Standards Board (GASB):

  - Statement No. 34, Basic Financial Statements- and Management’s Discussion and Analysis- for State and Local
    Governments;
  - Statement No. 37, Basic Financial Statements- and Management’s Discussion and Analysis- for State and Local
    Governments: Omnibus;
  - Statement No. 38, Certain Financial Statement Disclosures.

Statement No. 33 prescribes standards for recording nonexchange transactions on the modified accrual and accrual
bases of accounting. This standard required capital contributions from external parties to be recorded separately
on the Statement of Revenues, Expenses and Changes in Equity rather than as a direct addition to equity. There was no
effect on equity as a result of implementation of this standard as of July 1, 1999.

Statement No. 34 (as amended by Statement No. 37) resulted
in minor changes in the financial reporting model used by the
Water Utility. Statement No. 34 also requires, as required
supplementary information, Management’s Discussion and
Analysis, which includes an analytical overview of the Water
Utility’s financial activities.

Statement No. 38 requires certain disclosures to be made in
the notes to the financial statements concurrent with the
implementation of Statement No. 34. While this Statement
does not affect amounts reported in the financial
statements of the Utility, certain note disclosures have been
added and or amended.

On July 1, 1999, the Water Utility also decided to change its
capitalization threshold from $1,000 to $5,000. The Utility
wrote-off all capital assets under $5,000 and as a result
beginning equity was decreased by $276,000.

- **Revenue Recognition** The Water Utility uses the
accrual basis of accounting. Revenues are recognized when earned and expenses are recognized when incurred. Water
Utility customers are billed monthly. Unbilled water service
charges are recorded at year-end and are included in accounts
receivable. Unbilled accounts receivable totaled $1,640,000 at

An allowance for doubtful accounts is maintained for utility
and miscellaneous accounts receivable. The balance in this
account is adjusted at fiscal year-end to approximate the
amount anticipated to be uncollectible.

- **Utility Plant and Depreciation** Utility plant
assets are valued at historical cost or estimated historical cost,
if actual historical cost is not available. Costs include labor;
materials; allocated indirect charges such as engineering,
supervision, construction and transportation equipment,
retirement plan contributions and other fringe benefits; and
certain administrative and general expenses. Contributed plant
assets are valued at estimated fair market value on the date
contributed. The cost of relatively minor replacements is
included in maintenance expense.

Depreciation is recorded over the estimated useful lives of the
related assets using the straight-line method. The estimated
useful lives are as follows:

- Supply, pumping and treatment plant .................. 20-50 years
- Transmission and distribution plant.................... 30-50 years
- General plant and equipment............................ 3-50 years

- **Restricted Assets** Proceeds of revenue bonds yet to
be used for capital projects, as well as certain resources set aside
for debt service, are classified as restricted assets on the balance
sheet because their use is limited by applicable bond covenants.

- **Cash and Investments** The City follows the
practice of pooling cash and investments of all funds except for
funds required to be held by outside fiscal agents under the
provisions of bond indentures. Cash accounts for all City
funds are pooled for investment purposes to enhance safety
and liquidity while maximizing interest earnings. Interest
income earned on pooled cash is allocated monthly to the
various funds of the City based on the month-end cash
balances. Cash and investments held by fiscal agents are
credited directly to the related accounts.

The City values its cash and investment in accordance with
provisions of Governmental Accounting Standards Board
(GASB) Statement No. 31: Accounting and Financial
Reporting for Certain Investments and External Investment
Pools (GASB 31), which requires governmental entities,
NOTE 1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

including governmental external investment pools, to report certain investments at fair value in the balance sheet and recognize the corresponding change in the fair value of investments in the year in which the change occurred. Fair value is determined using quoted market prices.

All highly liquid investments (including restricted assets) with a maturity of three months or less when purchased are considered to be cash equivalents. Cash and investments held on behalf of the Water Utility by the City Treasurer are considered highly liquid and are classified as cash equivalents for the purpose of presentation in the statement of cash flows.

Inventories The City maintains a separate Central Stores inventory. The Water Utility expenses items as they are drawn out of Central Stores. As such, the Water Utility does not include inventories in its financial statements.

Bond Discounts, Capital Appreciation and Issuance Costs Bond discounts, capital appreciation and issuance costs are deferred and amortized over the term of the bonds using the effective interest method. Bond discounts and capital appreciation are presented as a reduction of the face value of bonds originally issued at a discounted amount. These bonds do not pay annual interest and mature at a predetermined par value.

Customer Deposits The City holds customer deposits as security for the payment of utility bills. The Water Utility’s portion of these deposits as of June 30, 2001 and 2000, was $310,000 and $373,000, respectively.

Compensated Absences The accompanying financial statements include accruals for salaries, fringe benefits and compensated absences due employees at June 30, 2001 and 2000. The Water Utility treats compensated absences due employees as a current liability. The amount accrued for compensated absences was $1,735,000 at June 30, 2001, and $1,575,000 at June 30, 2000, and is included in current liabilities in the accompanying balance sheets.

Employees receive 10 to 25 vacation days per year based upon length of service. A maximum of two years vacation may be accumulated and unused vacation is paid in cash upon separation.

Employees primarily receive one day of sick leave for each month of employment with unlimited accumulation. Upon retirement or death only, a percentage of unused sick leave is paid to certain employees or their estates in a lump sum based on longevity.

Self-Insurance Program The Water Utility participates in a self-insurance program for worker’s compensation and general liability coverage that is administered by the City. The Water Utility pays an amount to the City representing an estimate of amounts to be paid for reported claims incurred and incurred but unreported claims based upon past experience, modified for current trends and information.

Although the ultimate amount of losses incurred through June 30, 2001, is dependent upon future developments, management believes that amounts paid to the City are sufficient to cover such losses. Any losses above the City’s reserves would be covered through increased rates charged to the Water Utility in future years.

Employee Retirement Plan The City contributes to the California Public Employees Retirement System (PERS), an agent multiple-employer public employee retirement system that acts as a common investment and administrative agency for participating public entities within the state of California.

All permanent full-time and selected part-time employees are eligible for participation in PERS. Benefits vest after five years of service and are determined by a formula that considers the employee’s age, years of service and salary. Employees may retire at age 55 and receive 2 percent of their highest average annual salary for each year of service completed. PERS also provides death and disability benefits. These benefit provisions and all other requirements are established by state statute and City ordinance.

Employee contributions are 7 percent. The Water Utility is required to contribute the remaining amounts necessary to fund the benefits for its employees using the actuarial basis recommended by the PERS actuaries and actuarial consultants and adopted by the PERS Board of Administration. The Water Utility pays both the employee and employer contributions.

Citywide information concerning elements of the unfunded actuarial accrued liabilities, contributions to PERS for the fiscal year ended June 30, 2001, and recent trend information may be found in the notes of the City’s “Comprehensive Annual Financial Report” for the fiscal year ended June 30, 2001.

Contributions to the City’s General Fund Pursuant to the City Charter, the Water Utility may transfer up to 11.5 percent of its prior year’s gross operating revenues to the City’s general fund. In fiscal years 2000-01 and 1999-00, the Water Utility transferred 11.5 percent of gross operating revenues, or $3,023,000 and $2,943,000, respectively.

Budgets and Budgetary Accounting The Water Utility presents, and the City Council adopts, an annual budget. The proposed budget includes estimated expenses and forecasted revenues. The City Council adopts the Water Utility’s budget at its last meeting in June via an adopting resolution.

Reclassifications Certain reclassifications have been made to the prior year’s financial statements to conform with the current year’s presentation.
**Notes to the Financial Statements**

**NOTE 2. CASH AND INVESTMENTS**

Cash and investments at June 30, 2001 and 2000, consist of the following (in thousands):

■ Debt Service Coverage Ratio  The Water Utility’s bond indentures require the Water Utility to maintain a minimum debt service coverage ratio, as defined by the bond covenants, of 1.25. The Water Utility’s debt service coverage ratio was 3.31 at June 30, 2001, and 3.17 at June 30, 2000.
NOTE 5. RESTRICTED EQUITY

Pursuant to applicable bond indentures, a reserve for debt service has been established by restricting assets and reserving a portion of equity. Bond indentures for Riverside’s water revenue bonds require reserves that equate to the maximum annual debt service required in future years plus three months interest and nine months principal due in the next fiscal year. The reserve for Riverside’s portion of FARECal revenue bonds is equal to 10 percent of the program agreement amounts. Additional reserves for the 1998 revenue bonds are not required due to the purchase of surety bonds to cover the required reserve requirements.

NOTE 6. JOINTLY-GOVERNED ORGANIZATIONS

On July 1, 1993, the City of Riverside joined with the cities of Anaheim, Colton, Compton, Healdsburg, Los Angeles, Palo Alto, Pasadena, Redding, Santa Cruz; the North Marin Water District; the Northern California Power Agency; the Sacramento Municipal Utility District; and Turlock Irrigation District to create the Financing Authority for Resource Efficiency of California (FARECal). The primary purpose of FARECal is to issue bonds and use the proceeds to promote, advance, encourage and participate in conservation, reclamation and other programs that are designed to utilize energy or water resources more efficiently. FARECal is administered by a Board of Directors comprised of one representative from each charter member (the cities of Anaheim, Los Angeles, Palo Alto and Riverside and the North Marin Water District) and three voting-based directors, which currently are representatives from Trinity Public Utilities District, Colton and Pasadena. The Water Utility’s portion of the FARECal debt and utility plant assets is recorded in the accompanying financial statements.

NOTE 7. LITIGATION

The Water Utility is a defendant in various lawsuits arising in the normal course of business. Present lawsuits and other claims against the water utility are incidental to the ordinary course of operations of the water utility and are largely covered by the city’s self-insurance program. In the opinion of management and the city attorney, such claims and litigation will not have a materially adverse effect upon the financial position or results of operation of the water utility.

NOTE 8. SPECIAL ITEM

In May 2001, the City settled a lawsuit it had brought against certain manufacturers and distributors of dibromochloropropane ("DBCP"). DBCP, a pesticide that the Environmental Protection Agency banned in the mid 1970’s, was detected in certain City-owned potable wells. The forty-year settlement agreement with the Dow Chemical Company, Shell Oil Company, Shell Chemical Company, Occidental Chemical Company, The Best Fertilizer Company and Occidental Petroleum Corporation (the “DBCP” defendants) provides for the DBCP Defendants to compensate the City for the costs of constructing, installing, maintaining, testing and operating granular activated carbon treatment facilities to remove DBCP from certain City wells. The settlement agreement is expected to cover the majority of such treatment costs and will help the City maintain a potable water supply that does not exceed federal and state limits for DBCP.

NOTE 9. SUBSEQUENT EVENT

On August 2, 2001, the City issued $20,000,000 of water revenue bonds due in annual installments from $345,000 to $1,230,000 through October 1, 2031, interest from 2.6 percent to 5.0 percent.
