It is important that customers are able to measure the success and quality of service by easy to understand performance measures. Riverside Public Utilities (RPU) owns a significant amount of property primarily through the acquisition of numerous private water companies over the past century. Property has also been acquired for operational purposes of RPU.

The electric and water utilities may be required to purchase and maintain property in the course of operations. It is intended that only property required to provide service to current or future customers shall be retained or purchased by RPU. Property may be kept for extended periods of time if there is any anticipation that the property may be required for operational purposes at any time in the future. Furthermore, if property owned by RPU is in an area where future property will be required, but its exact location not yet determined, it is appropriate to retain the existing property until such time as the sales proceeds can be utilized to purchase replacement property for operational needs.

Property shall periodically be reviewed by RPU and any property deemed surplus shall be sold when economically and practically feasible with the advice of the Board and approval of the City Council. Market conditions and number of parcels may require property disposition to occur over an extended period of time as approved by an ad hoc committee established by the Board.

Policy No: **B-2**

Standing Rule 8 (attached to Policy A-1) outlines the establishment and composition of Committees of the RPU Board. This board policy provides additional detail.

Board committees, when used, will be assigned so as to reinforce the wholeness of the Board's job and so as never to interfere with delegation from the Board to the General Manager. All standing committee activities shall be subject to requirements of the Ralph M. Brown Act of the State of California. Committees usually meet monthly at a time and place determined by the members.

Accordingly:

1. Board committees are to help the Board do its job. Committees ordinarily will assist the Board by preparing policy alternatives, implications, and direction for Board deliberation.
2. Board committees only meet when there are topics or issues that need further deliberation by the committee to benefit the Board as a whole. It is normal for scheduled committee meetings to be cancelled when it is determined further discussion on individual items will not benefit the Board in their advisory or decision making policy.
3. The only Board committees are those which are set forth in the Standing Rules.

a. Customer Relations/ Finance Committee

The Customer Relations/Finance Committee will review financial results, rates, financings and strategies related to both the electric and water utilities. The Customer Relations/ Finance Committee is composed of the Board members as discussed in the Standing Rules.

b. Electric Committee

The Electric Committee will review financial results, rules, rates and strategies related exclusively to the electric utility. The chair of this committee serves on the Customer Relations/Finance Committee.

c. Water Committee

The Water Committee will review financial results, rules, rates and strategies related exclusively to the water utility. The chair of this committee serves on the Customer Relations/Finance Committee.

4. The Board Chair may appoint other ad hoc committees, on an as needed, temporary basis.
5. This policy applies to any ad hoc committee which is formed by Board action.
