Scope:
This Standard is applicable when installing duct bank for future infrastructure.

Typical Duct Bank

 wooden barrier
 coupling
 backfill against temporary wooden barrier held flush against couplings.

Install universal conduit plug (UGS-142); plug will snap in tightly and provide a watertight fit without cement.

Completely Capped Duct Assembly

Notes:
1. When capping unencased conduit (2 Max.) install conduit plug in coupling same as shown above (Do Not Stagger).
2. See UGS-125 for conduit spacing and concrete encasement.
