ATTACHMENT 1 TO SCHEDULE SELF-GEN

Avoided Cost of Energy Rate (Buy Back Rate)

Schedule Self-Gen provides that the Avoided Cost of Energy (ACOE) rate, or buy back rate, will be posted on the Utility's website on July 1 of each year and will be effective from July 1 through June 30 of the following year. The ACOE calculation includes the calendar year 3-year historical average hourly Utility costs. The ACOE is approved annually by the General Manager, as referenced in City Council Resolution No. 22141.

The ACOE represents the avoided Utility costs and is the amount the Utility will credit Eligible Customer-Generators for energy supplied to the Utility by Renewable Electrical Generation Facilities. The ACOE rate components are included in Schedule Self-Gen.

As required by Schedule Self-Gen, the General Manager hereby approves the following ACOE of **$0.0832 per kWh**, effective July 1, 2025 through June 30, 2026. Customer-Generators whose otherwise applicable tariff (OAT) is a time of use rate schedule will have the ACOE applied by time of use period equivalent to the time of use period and energy rates Eligible Customer- Generator's OAT. If the Eligible Customer-Generator's OAT is not time based, the ACOE will be applied equally to all energy supplied to the Utility.

Schedule D-TOU - Domestic Time-of-Use			
	Per kWh		
	Off	Mid	On
Summer	$0.0664	$0.0794	$0.1221
Winter	$0.0664	$0.0733	$0.0916

Schedule TOU – Large General and Industrial Service			
	Per kWh		
	Off	Mid	On
Summer	$0.0694	$0.0812	$0.0991
Winter	$0.0694	$0.0812	$0.0991

Schedule A – General Service			
Commercial Flat		Commercial Demand	
All kWh	$0.0832	All kWh	$0.0832
